

REPORTING AGGRESSIVE DRIVERS TO “ROAD WATCH”

One of our members has recently used the following website to report an aggressive driver incident:

Web site: www.roadwatch.ca

The service and website is maintained by **Road Watch**, a not for profit corporation, with headquarters in Caledon.

It is not necessary that an accident or collision have occurred. It can be used to report aggressive or abusive behaviour by a driver, provided you get the licence plate number. We should consider using this service whenever there are incidents that justify its use.

Watch for further news of the outcome of our first report under this program.

Andrew
