

ScooterBug Companion Tourist Resort ECV

ScooterBug Companion Tourist Resort ECV (electric convenience vehicle) is the perfect solution for any indoor venue.

With a growing need for ease-of-use mobility solutions that are stylish and compatible for an indoor facility, ScooterBug is proud to launch a 3-wheel ECV that addresses all of the functional requirements identified by our Fleet customers, and ensures the guest's needs are met and exceeded.

This latest offering from ScooterBug provides great legroom and foot room with a wide front deck and a stylish design. The ground clearance and tight turning radius make this unit work well both indoors and out.

It features a Delta tiller for easier steering for those with arthritis or just want to drive with one hand. The ScooterBug Resort ECV 3-wheel also has the exclusive LiquiCell 18" x 16" vinyl seat with a gel insert and adjustable armrests. Troubleshooting and maintenance are simplified and never far away with the under carpet instructions.

The ScooterBug Companion Tourist Resort ECV is the ultimate design in indoor scooters.
