

# Gator-Bite - 'Big Pull' Cut-Out Templates

for making twisted boutique hair bows, surrounds, classic hair bows & spikes.

Note: Nip sharp corners on black lines.

Note: To make the same size bow shown in video (approx 4"), cut along the solid lines. For a larger (approx 5.5" - 6"), include the blue lines in cut (larger bow is easier for a beginner). Cut gray area if hole punch does not reach pattern. Twister perk tabs can be angled or squared (angled = clean cut).
