## NEW VENUES

**BABCIA'S 1st Annual Dyngus Day Party at the Lancaster Elks Club**  
**33 Legion Parkway, Lancaster**  
Looks like the sisters behind Babcia's pierogi, (that had been showing up at various festivals and Polish themed events throughout our region for the last few years), aren't satisfied with simply feeding us. Now they want to ensure we eat, drink and polka to our hearts content. The eating part's a no brainer. If you've never tried their homemade pierogi Get ready for a treat because they've taken pierogi to a whole new level. Bring the kids from 3-6 or get your polka on with Mon Valley Push @ 6PM.

**CAPT. SMITHS ANCHOR INN**  
**2437 William Street, Cheektowaga**  
Technically this is Chris Smiths second Dyngus Day since taking the helm of this venerable corner tavern, but this year, it's full steam ahead. Beginning with breakfast specials at 8AM, that's right 8am!! This place is not kidding around, they continue on with Zywiec and Belvedere specials all day long and then really kick it into high gear with Phocus performing their own brand of polka frenzy starting at 1 - 4pm. Don't worry about missing the parade. The Anchor Inn is now on the shuttle route.

**THE HAPPY SWALLOW**  
**BAR & RESTAURANT**  
**1349 Sycamore Street, Buffalo**  
This joint is the real deal. Home to one of the largest social clubs in the city during the 40s and 50s, the Happy Swallow is now run by the Galimowski family. Although they have operated this institution since 1987, this is their very first Dyngus Day Bash. Another stop on the shuttle route, but you may want to stop in earlier for their delicious food. Not only do they offer what many consider the best old fashioned tavern fish fry in WNY, but on Dyngus Day they will have a mouth watering array of traditional Polish foods as part of a buffet that will be available beginning at noon. After the parade the old world charm of this place really crystallizes with the sounds of the Docenko Duo. It's easy to find at the corner of Sycamore and Titus Streets but if you use the shuttle you don't even have to worry about using GPS.
