

Ever notice that everyone gathers in the kitchen at a party? It's usually the hub of activity as well as the most welcoming spot in the house—and often where you'll find the person whom all of the guests know best putting the finishing touches on the food. The next time you entertain, rather than doing all of the work yourself, consider having a cooking party and making dinner a collaborative effort. At the end of the night, you'll know you've had a successful party when your guests go home full, happy -- and a little more skilled in the kitchen.
