The 1st Meeting of the Great Green Group

Ecomenistic Secular and Church Partnership

GENERAL

The Great Green Group is freshly establishing as an international authoritative team for an instant response to the modern climatic, environmental and resource problems. By definition, the members of the Group are world's green leaders and thinkers. Surely, the membership in the Group is voluntary and honorary free. In the context of the foregoing issues, the members of the Great Green Group use disinterestedly their authorities to promote the most potent green projects in the world.

Currently, the Great Green Group is informal with the possibility of institutionalization in the near future.

The expected members of the Great Green Group 2015 are:

Sir Richard Branson, UK

Hillary Clinton, USA

Leonardo DiCaprio, USA

Filaret, Patriarch of Kyiv and All Rus-Ukraine, Ukraine

Pope Francis, World Catholic Church, Vatican

Angela Merkel, Germany

His Highness Sheikh Mohammed Al Maktoum, Dubai, UAE

Ruslana, Ukraine

Arnold Schwarzenegger, USA

His Beatitude Svyatoslav, Ukrainian Greek Catholic Church, Ukraine

Mathis Wackernagel, Global Footprint Network, USA

Plus members of The Elders, the group created by Sir Richard Branson

Patronage: Dr. Peter Poroshenko, President of Ukraine

General idea:

Dr. Nick Yurchenko, co-author of the concept of the United Green Nations 2050 with the accompanying projects

Presentation site <http://nickyurchenko.wix.com/unitedgreens>

Meeting place: Kyiv or London, Vatican, Dubai

PROJECTS

Ukraine as an initiator brings to the Group the newest concept of the global sustainable development called the United Green Nations 2050 (UGN 2050) with the following noble projects:

1. Creating the first ever in the world eco-political alliance (called Green ABCR Group or BRACARUS) composed of Australia, Brazil, Canada and Russian Federation, the countries that are currently eco-surplus in the terms of ecological footprint metrics and possess powerful national economies. An alliance BRACARUS is creating in contrast to generally known retro-political, retro-economical and actually eco-heterogeneous alliances or groups such as G7, G20, BRIC, BRICS and other due to the progressing deactualization of an exclusively political and economical approach to the development of modern global processes.
2. Dispatenting the breakthrough green technologies and decopyrightization of the environmentally important information for the benefit of world community.
3. Creating the first ever in the world eco-religious alliance called the Green Islamic Forum (Green Islamic Group) with its capital Eco One (the modern green city located in close proximity to the historical Dubai, the United Arab Emirates). According to the project, Islamic countries of the world are consolidated around an idea to build Islamic green economies with the use of the original system of Islamic finance.

Find basic directions of the reconstruction of an available world political system on the pro-ecological grounds here <http://nickyurchenko.wix.com/unitedgreens#!documents/c1ktk>

3

The sub-project to prepare Leonardo DiCaprio for the Nobel Peace Prize for the eco-design of world new-order

The project provides direct and active participation of Leonardo DiCaprio in creating the first ever in the world eco-political alliance composed of Australia, Brazil, Canada and Russian Federation, the countries that are currently eco-surplus in the terms of ecological footprint metrics and possess powerful national economies. This alliance, called the Green ABCR Group or BRACARUS, is based on the pro-environmental principles instead of retro-political and retro-economical ones allowing thus to start the total reconstruction of an available world political system on the pro-ecological grounds.

An alliance BRACARUS may be extended by the participation of other eco-surplus and eco-neutral countries (transforming thus into the alliance BRACARUS+).

Nobel formula: For the design of an available world system on the pro-ecological grounds

4

The sub-project to prepare HH Sheikh Mohammed for the Nobel Peace Prize for the eco-design of world new-order

The project provides direct and active participation of His Highness Sheikh Mohammed in creating the first ever in the world eco-religious alliance called the Green Islamic Forum (Green Islamic Group) that is destined to consolidate Islamic countries of the world around an idea to build green economies with the use of the original system of Islamic finance. This alliance is based on the pro-environmental principles instead of retro-political and retro-economical ones allowing thus to reconstruct an available world political system on the pro-ecological grounds.

Nobel formula: For creating the world alliance of green Islamic economies

P.S.

1. The term “ecomenistic” is used in the title of general program instead of the term “ecumenistic” to emphasize an environmental part of this partnership

2. Currently, terroristic Russian Federation has not the right to take direct part in the organization of the alliance BRACARUS+
