

AFFINITY GOLD CORP

“Our goal is to demonstrate Proven & Probable Reserves in excess of 1.2M oz Au and 37.3M oz Ag through production, additional exploration and collaboration of historical drill and production data.”

Corey Sandberg, CEO
Affinity Gold Corp.

AFFINITY GOLD CORP. (Ticker: AFYG) is a junior mining company focused on the acquisition and immediate production of hard-rock and alluvial mining concessions located within Peru.

The Company's focus is on identifying, securing and developing projects that have past production history, can go into production within 6-12 months for less than \$2M in capital expenditures and can recover its capital within less than 18 months.

MACHACALA PROJECT

Affinity has recently entered into a Letter of Intent to Acquire a 60% ownership stake in a project called 'Machacala' which is a tailings and underground hard rock mine meeting the Company's requirements for near-term production.

HIGHLIGHTS

- Previously producing mine with historical data
- 210,000 Metric tons of tailings containing economical grades of gold & silver
- Tailings alone represent immediate production with an estimated gross value of \$20MM
- Three major vein systems identified consisting of 13 veins
- Four of the 13 veins have been partially exploited with 1 accounting for approximately 75% of past production

TAILINGS SAMPLE ASSAY DATA

In 1997, Gold Hawk Resources, then a TSX-V listed public company later acquired by Oracle Mining Corp, took 70 samples from the tailings and had assayed.

In 2011, another company, EREP, S.A. took 35 samples, alongside Gold Hawks previous samples, and had assayed.

COMPANY	YEAR	GOLD	SILVER
Gold Hawk	1997	1.34 g/t	56.36 g/t
Bumigene	1998	1.26 g/t	74 g/t
EREP	2011	2.01 g/t	50.79 g/t
Corizona	2012	1.71 g/t	57.3 g/t

TAILINGS POTENTIAL

Volume: 210,000 Metric Tons (Est.)
Grades: 1.34g/t Au 9,000 oz.
56.36 g/t Ag 380,000 oz.
Value: \$20,000,000 Gross Potential (Est.)

Recovery Rates:

Metallurgical studies show 85%+ Au, 50%+ Ag recoveries in 24 hrs leaching on un-milled tailings. Re-milling (-400 mesh) shows ability to increase recoveries to 90% Au, 73% Ag in 24 hrs leaching.

UNDERGROUND HARDROCK POTENTIAL

Estimated Grades:

Gold (Au): 5 g/t Au
Silver (Ag): 155 g/t Ag

Estimated Vein Dimension Averages :

Strike Length: 1km (range 0.5km – 2.5km)
Depth: 500m (Au, Ag)
Width: 1.5m (range 1.0m – 10.0m)

Estimated Volume Potential:

Volume (m3): 750,000
Volume (TM/Vein): 1,875,000 (750,000 m3 x 2.5 sg)

Potential Per Vein:

Gold 301,000 oz. Au
Silver 9,338,849 oz. Ag

LEYES DE Au (EREP VS GOLD HAWK)
