Stage Design

TCG can help develop a stage design that will transform your event space, and create an exciting and entertaining platform to engage your employees. The stage environment will be an extension of your brand and will feature the latest in event technology. We will work with your presenters and events staff to design a set that not only is visually appealing but provides you a palette to teach and inspire your team!

Line Production

TCG can serve as your Line Producer, working with your corporate production team that implements meeting content. This position will also assist in writing project specifications and ensures timely project/speech/graphic releases (PowerPoint, Videos, Keynote, Graphics packages.). In this role TCG will develop the Show Flow and manage rehearsals to insure that all presenters needs are fulfilled on time and within budget.

Choreography

TCG can manage the choreography of your event to develop a seamless show that creates a beautifully themed music and visual experience for your attendees. The Choreographer will help presenters with their speeches, direct special performances and work with our audio, video, and lighting departments to accentuate the key moments of the show.

Technical Direction

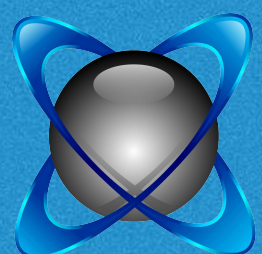

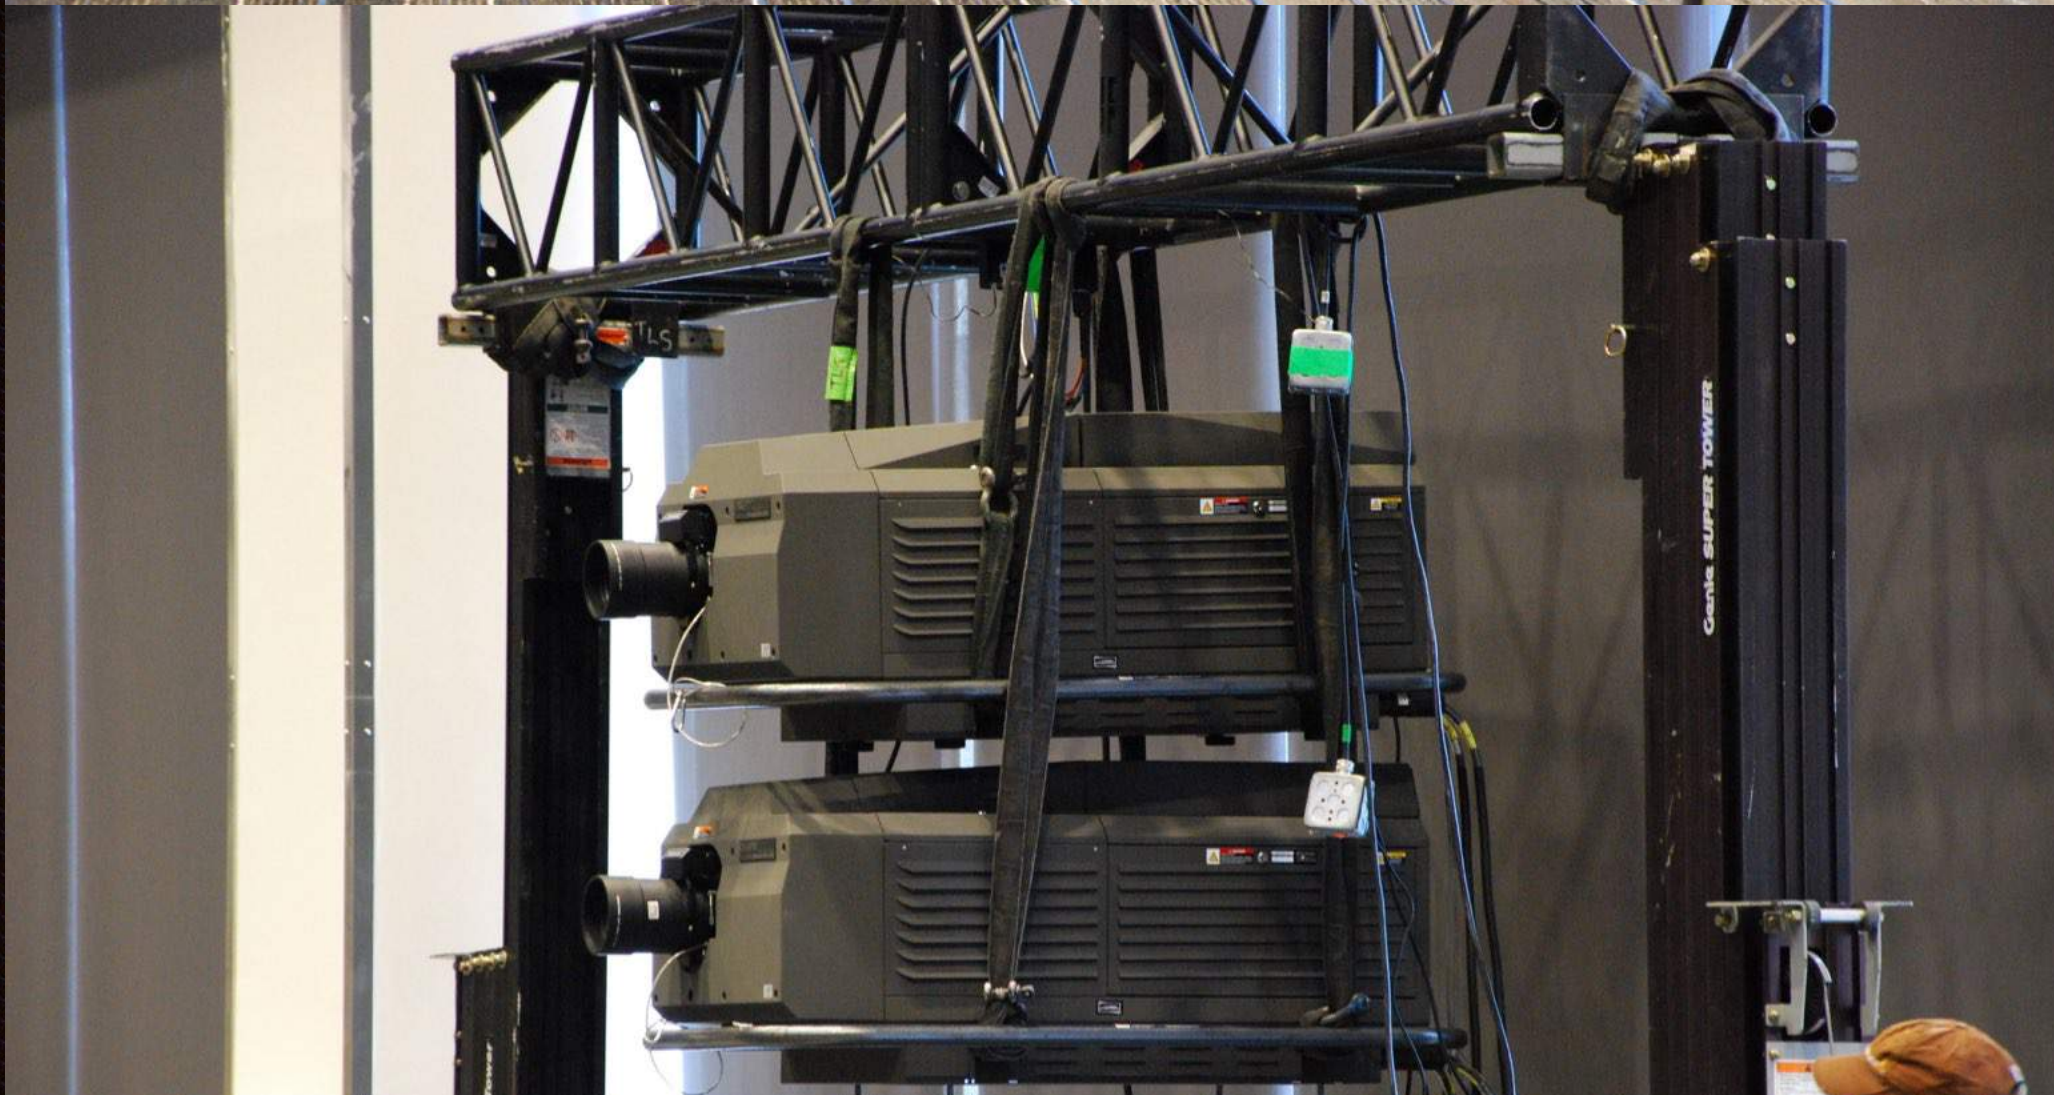

A live event is only as good as the pre-production that takes prior to the event. TCG prides itself on providing our clients the best in pre-production and technical direction needed to mitigate any onsite surprises. Every TCG show comes with a complete CAD and Vectorworks layout and our stage designs are created using the exact specification of each production element.

Engineering

TCG can develop a stage design and handle all the engineering and manufacturing required to take the design to a technical reality. The safety of all presenters and consultants in attendance is the upmost priority at TCG and that is why we engineer all our products to exceed industry safety standards.
