Attention Rebecca Szabo

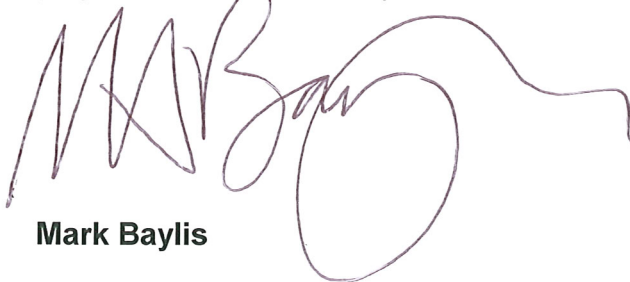

REFERENCE for
Roofing Work at High Street Frankton Hamilton,

WTC Roofing carried out roofing work for a property owned by ONTRACK (New Zealand Rail) at 104 High Street in Frankton in 2008. The work entailed the supply and installation of a new roof of approx 1000 m² to replace the existing leaking roof, which was severely deteriorated.

The work was carried to meet the standards the main Contractor had set. The new roof was installed with little disruption to our tenant and the co-ordination by the contractors was very good.

The roof is now watertight and all the necessary warranties have been furnished. The tenants are very happy with the new roof installed by WTC Roofing.

Should any of your prospective clients or building owners wish to discuss the project with ONTRACK, please direct them to my contact numbers noted below.
