# INTRODUCING GRANITH

## THE COMPANY

TheSize, the international company pioneer in solutions for architectural surfaces, presents its collection of 12 natural granites: Granith.

With this line, TheSize reinforces its passion for natural materials across two major product categories: Neolith, the 100% natural Sintered Compact Surface and Granith, a selective range of Natural Granites. Granith represents a strong bet on distinction and elegance, granting a unique perspective that transforms any given space into a piece of art thanks to its purity, exotism and strenght.

## THE QUARRIES

TheSize has carefully selected, the different models of the Granith collection, originating from quarries located in the heart of the African and South American continent.

The exoticism of its origin and the unique geological composition of these quarries, along with the state-of-the-art technology employed and the team of experts working there make an environmentally respectful extraction practice make of Granith an exquisite granites collection especially designed for the most demanding professionals of the natural stone sector.

# WHY GRANITH ?

## **Selective Product**

Granith has its origins in exotic quarries with highly controlled production. The 12 different models show a unique character and stand out for its timeless beauty and defined personality.

## **Top Quality**

Selection of the highest quality material thanks to the numerous and rigorous quality controls along the entire value chain from extraction to production, with the aim of providing a unique experience for granite lovers.

## **Experience and Know-How**

TheSize team has over four decades of experience in the natural stone sector. This deep knowledge of the market ensures a rigorous material selection and excellent customer service.

## **Resistance to Wear and Tear**

Its hard surface makes it resistant to scratches and abrasion when being exposed to extreme weather conditions (such as sand storms or other similar aggressions).

## **Hygienic**

Given its practically nul-porosity, it does not trigger any bacteria or fungus which may lead to allergies or illnesses.

## **Resistant to High Temperatures**

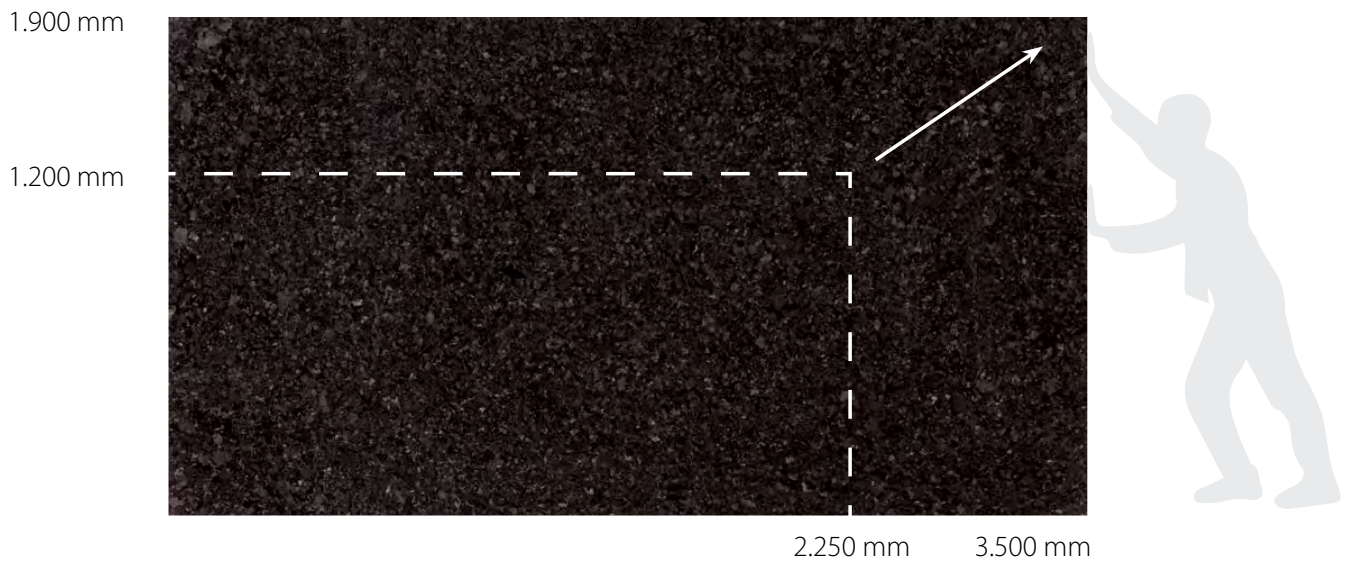

It does not burn in contact with fire nor does it emit smoke or toxic substances when being subjected to high temperatures.

## **Easy to Clean**

Resistant to any kind of chemical cleaning agent such as bleach or ammonia. When used in exterior cladding, this characteristic proves of high-added-value in areas with high pollution levels and risk of graffiti criminality.

## FORMATS AND THICKNESSES

The average slab dimension will range between the following measures:

**2.250 x 1.200 mm and 3.500 x 1.900 mm**

Available thicknesses:

- **2 cm**
- **3 cm**

## DARK PEARL

Dark Pearl, from Brazil, recalls a nacarish midnight, where the full moon breaks the emptiness of the black sky. The white pearl together with the slightly golden motifs and smooth veins, turn the Dark Pearl granite into the indisputed star of the space where it is placed.

## HABANA (EXTRA)

Habana, quarried in Angola, presents toasted brown refinements that recall the chromatic notes of aged tobacco leaves used in the production of cigars. Habana granite wraps anyone who sees it in a feeling of warmth and wellbeing, just like a habano cigar would do.

## BROWN AMBER

Brown Amber is also quarried in Brazil. Its design of white and greyish veins, dark amber shadows over a black background transmit all the strength and pride of a storm. Brown Amber adds elegance and sobriety to the space where it is applied.

NERO KARIBA

Nero Kariba is born in the heart of Zimbabwe. The beauty of its intense darkness lies within the simplicity of its design. Simple yet elegant, Nero Kariba will give a beautiful uniform reflection when is presented in Polished finish.

NERO INFINITO

Nero Infinito, originated in Angola, evokes the tonalities of the Cosmos: Thousands of greyish flashes over a pure black background recall millions of stars enlightening the darkness of the universe. Nero Infinito reflects in its depth the infinity of the universe.

# TRAMONTO

Like a sunset by the seaside, Tramonto from Brazil, encloses golden, yellow and toasted orange notes in a gorgeous heterogeneous design. All the fantasy and romanticism of a golden sunset in the Tramonto granite.

## SAHARA WINDS

Sahara Winds, also from Brazil, presents waves with orange and golden tones along with greyish and black shadows throughout its design. Sahara Winds is rich in movement and dynamism and gives a warm yet refreshing touch to any given space evoking sensations similar to desertic breezes of Sahara.

## BIANCA MACCHIATO

Bianco Macchiato, originating in Brazil brings light and freshness thanks to the off-white background and the combination of black and brown flecks heterogeneously distributed throughout the material.

MARE

Grawith  
*Selective Natural Stone*

Mare, from the Recife region of Brazil, expresses at its best the whimsical designs that nature gives away in rocks formation throughout millions of years. Blue, white, grey and brown tones complete a “sea” of beauty.

## VERDE FLORESTA

Verde Floresta, originating in Brazil, is characterized by the predominance of different green patterns over a clear background. All the green color variations together with the watery-design evoke the Amazon forest and rivers, of an area in Brazil known as Floresta.

## TORRONCINO

Torroncino combines splashes of brown, white and cream colors in its design, adding light and depth to the space where it is applied.
