

... WIN MORE AWARDS. We understand the impact that A/E fees can have on your winning an award or losing one. Unlike huge firms we have the flexibility to negotiate very **COMPETITIVE** fees due to our low overhead and we base our fees on the actual project parameters, not just a strict percentage of the project budget. This will result in a lower overall bid and a greater potential for you to win the project. In addition, we are an **SBA 8(a) certified** company; as your subcontractor, this could allow the awarding Agency to give preference to your bid in order to meet their small and disadvantaged business goals.

... MAXIMIZE COORDINATION DURING DESIGN. Unlike traditional delivery methods, which can ultimately pit the contractor and architect against each other, we are accustomed to working with you through every phase of the process, including design. Our goal is to work with you to find the most cost-effective and **PRACTICAL** solutions that will meet or exceed government requirements, while providing timely and effective document submittals to facilitate and expedite government reviews and approvals.

... REDUCE RISK. Our **EXPERIENCE** with the Design-Build delivery method is substantial; in fact, more than 70% of the projects we undertake are Design-Build. Our goal is to utilize the knowledge we have gained over the years for the protection and benefit of the team as a whole. We embrace and understand the “team” concept and processes that are necessary to achieve success and effectively manage risk on Design-Build projects. In addition to our own experience, we constantly evaluate our approach with best practices as outlined by the Design-Build Institute of America (DBIA).

... STAY ON SCHEDULE. Time is money in our industry and we understand the importance of being **RESPONSIVE**. We are mindful of how delayed responses to RFI's, submittals, and general project correspondence can affect the project schedule. This is why we work with you to establish a clear channel of communication and protocol at the outset of the project. It is our policy to be available to you 24 hours a day, 7 days a week.
