

# Have You Seen What's Lighting Up Modern Escalators?

## Mathis Electronics Under-Step Demarcation Light

**Available in 24v  
and 115v**

**Extended Life** – Depending on conditions, our LED demarcation light can provide up to 50,000 hours of continuous service without significant dimming. We give a **Lifetime Warranty** on every unit. That results in **Greater Safety** for your passengers and **Lower Liability** for you.

**Inexpensive** – As far as we are aware, our MES970 is the most economical LED demarcation available.

**Water Resistant** – The MES970 demarcation light is poured in epoxy, making it almost impossible for water to get into it.

**Practicality** – Unlike fluorescent units which light up the entire machine area, the MES970 emits bright points of green light directed toward the passenger's eyes, signaling him or her that he/she is approaching a danger point. The overall light output of our LED demarcation light is less than that of a fluorescent unit, but it is only directed where it is needed, and is much brighter at the LEDs than at any point on a fluorescent tube (see data sheet).

**Does it meet the code?** Yes, it does! If your inspector is questioning whether or not LED demarcation lights meet the code for elevators/escalators, please contact us for more information.

**Lower Power Consumption** – Our MES970 demarcation light is a **GREEN** product (no pun intended). It consumes 1 watt of power, compared to the approximately 35w consumed by a typical fluorescent unit. The unit can pay for itself in energy savings in a year or two.

MES970 (24vac) - \$57.50 ea at qty=30+  
\$98.00 ea at qty=<30

MES891 (115v) - \$65.50 ea at qty=30+  
\$110.00 ea at qty=<30
