

Commercial Damages

An updated and revised Chapter 22 of Commercial Damages (New York: Matthew Bender) was published in 2007: "Measuring Lost Profits Damages" by Drs. Pat Gaughan and Michael Brookshire. Dr. Brookshire has co-authored this chapter since Commercial Damages first appeared in 1986. Dr. Gaughan is also the author of a leading text on lost profits damages.

Research on the specific application of commercial damages calculations in eminent domain litigation was introduced in a paper presented by Mr. Barrett at the annual conference of the Southern Economic Association in 2002.

Dr. Brookshire and Mr. Barrett have been involved in a wide array of commercial damages cases. The last chapters of Dr. Brookshire's 1987 and 1990 books are devoted to this topic.
