

Game Designer

ArchieMD seeks an ambitious Game Designer to create professional and innovative medical applications and games. Successful candidates will work directly with the team to create high quality designs for a variety of mediums. Candidates must have a solid knowledge of design best practices, latest trends, and ideas that would augment the user experience. The position offers a unique opportunity to work on creative applications that challenge the state-of-the-art.

Position Requirements:

- 3 to 5 years experience using Microsoft Office Suite, especially Word and PowerPoint.
- Strong verbal, written, and presentation skills.
- Degree in game design. Experience on released titles is a plus.
- Strong knowledge of UI/UX design.
- Ability to work in a team environment to take direction, develop, and implement designs.
- Desire to work on educational games.
- Mobile application design and development is a plus.

ArchieMD, based in Boca Raton, FL, is a growing technology company (~20 employees) that develops interactive and immersive applications to teach medical concepts to wide array of stakeholders (students, doctors, nurses, patients, jurors, military personnel). These applications seek to use visual and interactive techniques to teach complex medical concepts. Currently the company is developing state-of-the-art immersive environments (using augmented reality), 3D simulations, series games, and interactive applications. www.archiemd.com.
