

100Km CMRR Split Time Sheet

So that relay race results can include individual runners' times, please follow these directions:

1. Throughout the relay, record your team's relay leg times below. A watch which stores ten times or more in its memory is best.
2. Hand this completed split time sheet to a CMRR race official at the finish area within 10 minutes after your last runner finishes.

Applicable rules:

The race director's watch will be the standard by which final team finishing times are determined. Your team's official clock will start ticking at your assigned starting time. To allow sufficient time for results to be processed and awards to be determined, **official team timing will end at 4:00 PM ET.**
