

"Autism and Vaccinations – The Data" © by Planet Autism

The Claims

Authority claims that vaccines are safe and there is no link between vaccines (*such as the MMR*) and autism. People are usually inclined to trust authority until they find out different.

Every GP practice has posters on the wall urging parents to bring their child for their 'routine' vaccinations and follow-up boosters. The health book that UK parents are supposed to take for every health appointment their baby/child has, contains pages devoted to vaccination history and dates given, mixed in among the developmental milestones and weight/height pages.

If social services investigate parents, they will contact GP's and enquire as to whether the child's vaccinations are "*up-to-date*" and it is a question on nursery, playgroup and school registration forms. If a child is ever taken from it's parents by the actions of social services and the child is not "*up-to-date*" with vaccinations, that is one of the first things that will be addressed by the authorities, whether the parents agree or not.

In other words, despite vaccinations not being mandatory, it is seen as a failing by a parent, not to vaccinate. It's a bit like constructive dismissal from employment. How 'optional' is it really. And how optional is it going to remain? There are states in the USA that are making vaccination [mandatory](#), denying school places to unvaccinated children and in Australia they are [withholding benefits](#) from parents who don't vaccinate. In Pakistan they are [arresting people](#) who refuse to be vaccinated!

We are told by those we trust, that vaccines are safe. That in a tiny percentage of people, there may be an adverse reaction but these are very rare and that for the vast majority of people, they are safe. Vaccine injury is seen as necessary collateral damage. Until it's your child. We are told that there is "*herd immunity*" from vaccines and parents who don't vaccinate, are castigated as cruel and selfish for putting vulnerable others at risk of catching the disease from them. A tiny subset of individuals are (*ironically*) seen as having underlying health conditions (*which are obvious and diagnosed at the time*) that render them unable to have vaccinations for fear they would adversely affect them. The irony of that situation is lost on many. By that, I mean that if the vaccine were so safe, why would it matter either way, regardless of a pre-existing health condition.

Over and over again, scientists, mainstream media, authorities and autism charities (*who are partly Government funded and always toe the party line*), have repeated the mantra that vaccines do not cause autism. Parents are expected to blindly believe this, without having access to informed consent. Without being aware of all the research studies that show different.

So the purpose of this information, is to provide some data and encourage YOU to go out and do some reading. Know what it is you are allowing to be put into your precious child – or yourself. Help you not to blindly trust, no matter how reliable the source seems. If you take the choice to

vaccinate, at least you will be doing so armed with knowledge.

If vaccine injury results, at least you won't be blaming yourself for not having researched and simply having faith in authority figures (*many of whom have not done their research either*) – always wishing you had done more to check the facts out. You may still blame yourself even if you do research of course – but you will know it was your decision after you had weighed up the risks, there will be no "what if's".

This report will surely shock you (*it shocked me more than I had been, as I discovered new information as I compiled it*), if you haven't been aware of the information within, you are about to swallow the red pill and enter the rabbit hole, to have your eyes truly opened. That pharmaceutical organisations have been hiding the truth; governments complicit; conflicts of interest between authority and big pharma; vaccine research fraud, murder and cover-ups; compensation programmes which allow pharmaceutical companies off the hook and are unfit-for-purpose; multitudes of doctors speaking out against vaccines; how vaccine immunity is a con; the toxins in vaccines; retroviruses in vaccines inserting into your DNA causing serious illnesses and the media blackout of the truth!

This report is dedicated to Jodie Marchant who was vaccine damaged in 1993 causing severe autism, (*see end of report for link to Jodie's story, including how she was illegally given an untested 8-in-1 vaccine concoction, deliberately mixed in one syringe and how her parents received death threats when they spoke out*). It's dedicated to 5 year old Holly Marie Stavola who died from acute encephalitis from the MMR. Also Hannah Poling, Emily Moller, Ryan Mojabi (http://www.huffingtonpost.com/david-kirby/post2468343_b_2468343.html) and to all those before and since, who have been vaccine-damaged resulting in disability or death, after their trusting parents believed doctors and governments.

[Articles](#)

There is no question that autism rates have risen. We are told it's down to more awareness and better diagnosis. But this is simply not true.

"New Study Dispels Myth that Better Diagnosis is Responsible for Increase in Autism"

<http://vaccineimpact.com/2015/new-study-dispels-myth-that-better-diagnosis-is-responsible-for-increase-in-autism/>

Vaccinated v Unvaccinated Health

The problem is, that there are many invisible conditions and genetic vulnerabilities, which may be unrecognised or undiagnosed in an individual before they are vaccinated. When blanket vaccination is given without testing if someone is more vulnerable to injury than the norm, how can safety be guaranteed? It's a simple question with an obvious answer.

It might surprise you to know, that vaccinated vs unvaccinated studies have not been done by the mainstream (<https://healthimpactnews.com/2013/congressman-posey-introduces-bill-requiring-study-of-autism-rate-in-vaccinated-vs-unvaccinated/>). You have to ask why, bearing in mind the prevalent attitude to vaccinations being such wonderful, modern inventions that are a boon to the health of the world's population. How can they know that without checking one versus the other?

"Comparing Vaccinated to Unvaccinated Populations"

<http://www.vaxchoicevt.com/science/studies-comparing-vaccinated-to-unvaccinated-populations/>

Ah, but I hear you say, look how rates of deadly and infectious disease have dropped since vaccines have been around – there's the proof. That's what authority would have you think of course, but is it true? The truth is, that disease rates were already on the decline before vaccinations, due to improved sanitation and running water.

"Unvaccinated Children Healthier Than Vaccinated, 90's Study Proves" (in fact several such studies are referenced).

<http://yournewswire.com/unvaccinated-children-healthier-than-vaccinated-study-proves/>

"Vaccinated Children Have 2-5 Times More Diseases and Disorders Than Unvaccinated Children"

"Autism Rates Skyrocket in Asia After Introducing Western Vaccines"

<http://yournewswire.com/autism-rates-explode-in-asia-after-introducing-western-vaccines/>

Vaccinations Have Eradicated Diseases?

"Fact, Vaccines Have Never Eradicated Anything, Ever"

Data compiled by the National Health Federation (NHF), and relayed by Cynthia A. Janak of RenewAmerica.com, tells the real story about how virtually every major infectious disease of the 20th century was already on its way out long before its associated vaccine came onto the scene. This fact is clearly illustrated in [these powerful visual graphs created by NHF](#) that contain vital statistics from official U.S. public health records.

As you will notice in the first graph, mortality rates from diphtheria, for instance, had already dropped by more than half before a vaccine for the infectious bacterial disease was introduced in 1920. The same can be seen for both whooping cough (pertussis) and measles as well, the vaccines for which emerged in the mid-1940s and 1963, respectively."

<https://vactruth.com/2010/07/23/fact-vaccines-have-never-eradicated-anything-ever/>

"Real history: Vaccines not responsible for halting infectious diseases of 20th century"

"The Decline of the Infectious Diseases

The diagrams below complement the article titled [Myths of Modern Medicine: The Increase in the Human Life Span](#).

"The medical historians of our century... agree that the decline of the epidemics which had wrought havoc in the Middle Ages was not due to the introduction of vaccination, but of hygiene, for they had diminished long before large-scale inoculations had begun..." Hans Ruesch, '[History of Medicine](#)', Slaughter of the Innocent, CIVIS, 1991, p.194"

<http://www.medicinekillsmillions.com/articles/truth-about-decline-of-the-infectious-diseases.html>

"Vaccines Did Not Save Us – 2 Centuries Of Official Statistics"

<https://childhealthsafety.wordpress.com/graphs/>

Don't forget, statistics are prone to being manipulated. Some diseases have been renamed so they are not counted in statistics for the disease they are. Polio has just been renamed 'Acute Flaccid Paralysis' so they can hide that it hasn't disappeared!

"Smoke, Mirrors, and the “Disappearance” Of Polio"

<http://www.vaccinationcouncil.org/2011/11/17/smoke-mirrors-and-the-disappearance-of-polio/>

"Another ruse was to rename Polio and call it Aseptic Meningitis. It has been known by 200 names over the years."

http://www.thebirdman.org/Index/Others/Others-Doc-Health&Medicine/+Doc-Health&Medicine-MscCures&Suggestions/PolioCausedByPoisons_files/current16.htm

[Vaccine Safety and Efficacy](#)

Did you know, that no true safety testing has ever been done on the childhood vaccine schedule? Whether it's safe to have so many vaccines within such short space of time?

"Inadequate Vaccine Safety Research and Conflicts of Interest"

<http://www.ebcala.org/unanswered-questions/inadequate-vaccine-safety-research-and-conflicts-of-interest>

"Why I Explored Vaccine Problems"

Therefore, "control group" is given a "placebo" that is another vaccine, **not** saline, sterile water, or no vaccine at all."

<http://drtenpenny.com/dr-sherri-tenpenny/what-opened-my-eyes-to-the-problems-vaccines-cause/>

So what are the health issues that can arise from vaccines? What testing has been done? How often is vaccine injury happening? Below are examples of vaccination injury for a sample of vaccines. An article about epigenetic inheritance, where environmental damage of the mother's body is passed to her baby follows, which is for those who say that their child hasn't been vaccinated so their autism cannot have come from vaccines. Look up various research articles about the mother's immune system causing autism and join the dots.

"Are You Passing Vaccine Damage onto Your Baby?"

<http://www.hearthiswell.org/index.php/hear-this-well-blog/entry/are-you-passing-environmental-damage-on-to-your-baby>

"Epigenetics and autism - pharmaceutical effects on genes"

(admitting other pharmaceuticals affect genes, but yet vaccinations which are also pharmaceuticals supposedly don't...)

https://www.autismspeaks.org/blog/2012/03/20/toxicologists-study-how-pharmaceuticals-affect-genes?utm_source=/blog/2012/03/20/toxicologists-study-how-pharmaceuticals-affect-genes&utm_medium=text-link&utm_content=Toxicologists%20Study%20How%20Pharmaceuticals%20Affect%20Genes%20&utm_campaign=relateditems2

"Your Immune System, How it Works and How Vaccines Damage It"

<http://www.vaccineriskawareness.com/Your-Immune-System-How-It-Works-And-How-Vaccines-Damage-It>

Look up how outbreaks of disease are frequently occurring among the vaccinated, yet despite this, how authorities put panicked headlines in the media about the outbreaks, to encourage more people to be vaccinated and blaming low uptake of vaccinations for destroying so-called 'herd immunity'.

"Zero US Measles Deaths in 10 Years But Over 100 Measles Vaccine Deaths Reported"

<http://vaccineimpact.com/2015/zero-u-s-measles-deaths-in-10-years-but-over-100-measles-vaccine-deaths-reported/>

"Measles Outbreak Traced to Fully Vaccinated Patient"

<http://news.sciencemag.org/health/2014/04/measles-outbreak-traced-fully-vaccinated-patient-first-time>

"Case of vaccine-associated measles five weeks post-immunisation, British Columbia, Canada, October 2013"

We describe a case of vaccine-associated measles in a two-year-old patient from British Columbia, Canada, in October 2013, who received her first dose of measles-containing vaccine 37 days prior to onset of prodromal symptoms. Identification of this delayed vaccine-associated case occurred in the context of an outbreak investigation of a measles cluster."

<http://www.eurosurveillance.org/ViewArticle.aspx?ArticleId=20649>

"The ineffectiveness of Measles Vaccines and Other Unintended Consequences"

<http://www.vaccinationcouncil.org/2013/01/18/the-ineffectiveness-of-measles-vaccines-and-other-unintended-consequences-by-dr-viera-scheibner-phd/>

Do some reading on whether vaccines actually protect someone from the disease they are vaccinating against. Ask yourself why boosters are needed and research the progressively waning immunity of vaccines. Here is one article about someone actually dying from measles despite having been vaccinated.

"Woman Who Died of Measles Was Vaccinated"

<http://www.dailymail.co.uk/news/article-3148872/Woman-died-measles-vaccinated-patient-die-disease-U-S-12-years-succumbed-disease-health-problems.html>

Do some reading on how vaccinated people shed the disease and infect others. So whilst they falsely blame the unvaccinated for spreading disease to the vulnerable, it's more likely the vaccinated doing so!

"The big vaccine conspiracy: Secret documents confirm vaccines cause autism"

The UK Department of Health was forced to reveal confidential documents outlining the details of MMR's initial approval in the 1980s, following a Freedom of Information Act (FOIA) request. The FOIA request was filed in response to the growing number of children afflicted with debilitating gut problems, brain problems and other symptoms believed to be associated with MMR, following their vaccination.

As it turns out, the fears regarding the adverse effects of vaccines are not completely unfounded. The uncovered documents reveal that GlaxoSmithKline (GSK), the manufacturer of the MMR vaccine Pluserix, knew that the vaccines could cause serious complications in children, some of which are encephalitis and other conditions associated with autism."

<http://newstarget.com/2016-02-16-the-big-vaccine-conspiracy-secret-documents-confirm-vaccines-cause-autism.html>

This is the GlaxoSmithKline **"Confidential to Regulatory Authorities Biological Clinical Safety and Pharmacovigilance GlaxoSmithKline Research and Development"** document about Infanrix, listing multitudes of reported vaccine injury (autism is listed on P626):

<https://autismoevaccini.files.wordpress.com/2012/12/vaccin-dc3a9cc3a8s.pdf>

Herd Immunity – Myth or Fact?

"The Deadly Impossibility Of Herd Immunity Through Vaccination, by Dr. Russell Blaylock

In the original description of herd immunity, the protection to the population at large occurred only if people contracted the infections naturally. The reason for this is that naturally-acquired immunity lasts for a lifetime. The vaccine proponents quickly latched onto this concept and applied it to vaccine-induced immunity.

But, there was one major problem – vaccine-induced immunity lasted for only a relatively short period, from 2 to 10 years at most, and then this applies only to [humoral immunity](#). This is why they began, silently, to suggest boosters for most vaccines, even the common childhood infections such as chickenpox, measles, mumps, and rubella.

Then they discovered an even greater problem, the boosters were lasting for only 2 years or less.

If we listen to present-day wisdom, we are all at risk of resurgent massive epidemics should the

vaccination rate fall below 95%. Yet, we have all lived for at least 30 to 40 years with 50% or less of the population having vaccine protection. That is, herd immunity has not existed in this country for many decades and no resurgent epidemics have occurred. Vaccine-induced herd immunity is a lie used to frighten doctors, public-health officials, other medical personnel, and the public into accepting vaccinations.

When we examine the scientific literature, we find that for many of the vaccines protective immunity was 30 to 40%, meaning that 70% to 60% of the public has been without vaccine protection. Again, this would mean that with a 30% to 40% vaccine-effectiveness rate combined with the fact that most people lost their immune protection within 2 to 10 year of being vaccinated, most of us were without the magical 95% number needed for herd immunity. This is why vaccine defenders insist the vaccines have 95% effectiveness rates."

<http://www.vaccinationcouncil.org/2012/02/18/the-deadly-impossibility-of-herd-immunity-through-vaccination-by-dr-russell-blalock/>

So What's in Vaccines?

You'd be forgiven for thinking that it's just the weakened (attenuated) or killed version of the disease in a vial of sterile liquid that's being injected. After all, unless you know different, why would you question it? The following ingredients are a sample of ingredients all found in various vaccines, do your research on the vaccination you are considering for your child or yourself:

- traces of foetal tissue from cell lines of aborted fetuses (e.g. WI-38 & RA 27/3 cell lines) used to grow the virus/bacteria
- human albumin
- anti-freeze (ethylene glycol)
- monkey and other tissue containing DNA with retroviruses in some cases
- neurotoxins such as mercury, formaldehyde and aluminium
- a long list of other artificial ingredients which can be seen here:
<http://healthwyze.org/reports/60-vaccine-secrets>

"Whistleblower – Vaccine Retroviruses Cause Autism, Cancer and Auto-immune Disease: All Vaccinated Infected"

"New Study Finds Autism Linked to Foetal Contaminated Vaccines"

<https://www.lifesitenews.com/news/new-study-finds-autism-linked-to-fetal-contaminated-vaccines>

"Human Retrovirus, Chronic Illness, & Scientific Prejudice with Dr. Judy Mikovits

On July 22, 2009, a special meeting was held with 24 leading scientists at the National Institutes of Health to discuss early findings that a newly discovered retrovirus was linked to chronic fatigue

syndrome (ME/CFS), prostate cancer, lymphoma, and eventually neurodevelopmental disorders in children. When Judy Mikovits, PhD finished her presentation, the room was silent for a moment, then one of the scientists said, "Oh my God!" The resulting investigation would be like no other in science."

<http://fearlessparent.org/radio-blog-human-retrovirus-chronic-illness-scientific-prejudice-episode-59/>

"Mycoplasma Fermentans and Deciliation as a Precursor to Regressive Autism

One possible cause, espoused by parents, is vaccination, in particular the MMR vaccine. Official focus has, however, remained on the need to maintain public confidence in MMR in order to prevent communicable diseases, rather than on a thorough investigation of parental testimony. Independent examination of veterinary vaccine history and of the cell-line technology involved reveals a growing concern regarding contamination by covert pathogenic bacteria, in particular *Mycoplasma fermentans* (3). The introduction of a triple live virus vaccine (MMR) will have increased the probability of cell line contamination. It has been suggested that potentially 50% or more of cell lines worldwide are contaminated (4). *Mycoplasma* has an affinity to the cilia, the microscopic, hairlike structures or organelles that extend from the surface of nearly all mammalian cells, cilia are vital to the function of the auditory system. For regressive autistic children the world can be a confusing, isolating and daunting place and it is their fundamental problems with communication and social interaction that are often the root cause of their difficult behaviours."

<http://www.swiftjournals.org/sjmms/abstract/2015/september/Bill.php>

Search this website for the contents of vaccinations and medicines:

One example, MMR contains:

"produced in WI-38 human diploid lung fibroblasts. The vaccine may contain traces of recombinant human albumin (rHA)."

(aborted foetal lung tissue and DNA) Read the following link for further information.

<http://www.medicines.org.uk/emc/>

"The poliomyelitis vaccine, diphtheria, tetanus and pertussis vaccine (Infanrix) contains African green monkey kidney cells."

http://www.naturalnews.com/038873_childhood_vaccines_aborted_babies_dna.html

Why was this request by someone as to the contents of NHS vaccinations was classified 'refused' and dealt with in such an obscure fashion. The link given in the final response (www.immunisation.nhs.uk), to information on vaccination ingredients, supposedly in the public domain, goes to a strange DoH activity list which is nothing to do with vaccinations. The requester was seeking whether there was easily available information on ingredients for parents, such as in a leaflet, to give informed consent...there apparently isn't...

https://www.whatdotheyknow.com/request/vaccination_ingredients

The Research on Vaccinations and Autism

So, now we have got to vaccines and autism, what does the research say about the risks? You

might be interested to know, that many cases of autism result immediately following encephalitis, sometimes named encephalopathy or encephalomyopathy. It's swelling of the brain. And it is a known vaccine injury.

The following study in fact indirectly confirms the vaccine link, cytokine storm reaction is usual following vaccination. The US is compensating parents of autistic children for encephalitis and encephaly/encephalopathy.

"Relevance of Neuroinflammation and Encephalitis in Autism"

"In recent years, many studies indicate that children with an autism spectrum disorder (ASD) diagnosis have brain pathology suggestive of ongoing neuroinflammation or encephalitis in different regions of their brains. Evidence of neuroinflammation or encephalitis in ASD includes: microglial and astrocytic activation, a unique and elevated proinflammatory profile of cytokines, and aberrant expression of nuclear factor kappa-light-chain-enhancer of activated B cells. A conservative estimate based on the research suggests that at least 69% of individuals with an ASD diagnosis have microglial activation or neuroinflammation."

<http://journal.frontiersin.org/article/10.3389/fncel.2015.00519/full>

"Oxidation and Epigenetics in Human Brain: Implications for Vaccination"

"However, these unique features make the human brain more highly sensitive to factors that interfere with GSH formation, including inflammatory cytokines produced during the immune response and metals that are commonly incorporated into vaccines."

"Taken together the above findings indicate that vaccines and the immune reaction they provoke will produce a powerful oxidative stress response that not only involves immune cells, but may also impact neuronal function, especially in the developing brain."

The ability of TNF- α and peripherally administered aluminum and mercury to enter the brain is well-documented (24, 25), and both metals can be retained in the brain for many years.

Based upon these actions, it is reasonable to expect that vaccines may be an important contributing factor for the dramatic increases in autoimmune and neurodevelopmental disorders occurring over the past several decades."

"A link between thimerosal and the brain: Can vaccines affect central nervous system function?"

In their work, the scientists found that insulin-like growth factor-1 (IGF-1) and the neurotransmitter dopamine both stimulated folate-dependent methylation pathways in neuronal cells. At the same time they noted that compounds like thimerosal, ethanol and metals (like lead and mercury) effectively inhibited these same biochemical pathways at concentrations that are typically found following vaccination or other sources of exposure. By better understanding what happens when infants and children are exposed to these materials, the work of Deth and his colleagues helps to explain how environmental contact with metals and administration of certain vaccines may lead to serious disorders that manifest themselves during childhood, including autism and ADHD."

"22 Medical Studies That Show Vaccines Can Cause Autism

This may not be too surprising as the corporate media is owned by the major vaccine manufacturers, and the major vaccine manufacturers are owned by corporate media(1)(2)(3)(4). Given this fact, it's easy to fathom the possibility that these institutions are desperately trying to protect the reputation of their product.

For example, if we take a look at GlaxoSmithKline and Pfizer, they are owned by the same financial institutions and groups that own Time Warner (CNN, HBO etc.) and General Electric (NBC, Comcast, Universal Pictures etc.).(1)(2)(3)(4) This is seen throughout all of the major vaccine manufacturers and all of the 6 corporations that control our mainstream media. Keep in mind that these are the major funders of all 'medical research' that's used to administer drugs and vaccinations."

<http://www.collective-evolution.com/2013/09/12/22-medical-studies-that-show-vaccines-can-cause-autism/>

"Vaccines and autism – A New Scientific Review

For all those who've declared the autism-vaccine debate over - a new scientific review begs to differ. It considers a host of peer-reviewed, published theories that show possible connections between vaccines and autism.

The article in the *Journal of Immunotoxicology* is entitled "Theoretical aspects of autism: Causes--A review." The author is Helen Ratajczak, surprisingly herself a former senior scientist at a pharmaceutical firm. Ratajczak did what nobody else apparently has bothered to do: she reviewed the body of published science since autism was first described in 1943. Not just one theory suggested by research such as the role of MMR shots, or the mercury preservative thimerosal; but all of them.

Ratajczak's article states, in part, that "Documented causes of autism include genetic mutations and/or deletions, viral infections, and encephalitis [brain damage] following vaccination [emphasis added]. Therefore, autism is the result of genetic defects and/or inflammation of the brain."

<http://www.cbsnews.com/news/vaccines-and-autism-a-new-scientific-review/>

"Acetaminophen* use, measles-mumps-rubella vaccination, and autistic disorder: the results of a parent survey."

<http://www.ncbi.nlm.nih.gov/pubmed/18445737>

*acetaminophen is Paracetamol, Tylenol is an American popular brand, Calpol is the UK equivalent.

"Giving Tylenol (Paracetamol) After Vaccination Can Be Dangerous

Merck's manual advises acetaminophen, the active ingredient in Children's Tylenol®, is known to deplete glutathione levels in the body and can cause liver damage. [6] Glutathione is needed to help detoxify the body. It is a very important antioxidant that helps reduce oxidative stress which can lead to a large number of health problems, including brain damage.

Vaccinations load the body with viruses, bacteria, heavy metals, foreign animal, plant and human DNA contaminants, synthetic chemicals, genetically modified organisms, etc. Some of these ingredients are documented to cause cancer. Glutathione is needed to help the body rid itself of this toxic buildup."

<https://vactruth.com/2015/11/06/baby-dies-after-6-vaccine-doses/> (many tragic stories of previously healthy babies dying after vaccination on that website and the deaths recorded as unexplained SIDS with no mention of their vaccine history and the relevance it may have had to their death)

"Stoller, MD was trained as a pediatrician at UCLA and was a fellow of the American Academy of Pediatrics for two decades. In 2008 he resigned from the AAP after realizing that the AAP has known that mercury in vaccines can cause Autism and other neurological damage, yet the organization has refused to make a determined effort to have mercury (in thimerosal) removed from all vaccines. And in fact, has instead engaged in a cover-up to protect the interests of the vaccine makers and pharmaceutical empires. Please share far and wide - the public needs to hear this!"

<https://www.facebook.com/LarryCook333/videos/10153308464053589/>

"Diphtheria, pertussis (whooping cough), and tetanus vaccine induced recurrent seizures and acute encephalopathy in a pediatric patient: Possibly due to pertussis fraction

Pertussis component of the DPT vaccine is mainly responsible for neurologic reactions. It causes neurologic damage: by affecting cellular signaling, catecholaminergic and GABAergic systems and defect in blood-brain barrier due to endotoxin-mediated endothelial damage. Whole cell pertussis vaccine induces the IL-1 β production in the hippocampus and hypothalamus of vaccinated animals. This leads to decrease in release of the inhibitory neurotransmitters GABA and adenosine in the hippocampus and induce convulsive activity."

<http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3284047/>

"How to Increase GABA and Balance Glutamate

For example, the rubella virus, which is found in the MMR vaccination can decrease activity of glutamic acid decarboxylase (GAD) by as much as fifty percent. Thus, one of the reasons children begin to exhibit some of the symptoms of autism immediately after vaccination, as we mentioned earlier GABA is critical in speech and brain function."

<http://www.holistichehelp.net/blog/how-to-increase-gaba-and-balance-glutamate/>

So what do they do? They talk about creating drugs to increase GABA, after they have damaged it with vaccines! And so the pharmaceutical merry-go-round continues going round:

Conspiracy Theory? You Decide

The proof of concept short film for the upcoming "The Power to Cure" movie by Brian Hammers, writer and director, regarding the untimely and unsatisfactorily explained deaths of a host of holistic doctors, including Dr Jeff Bradstreet who was researching GcMAF therapy for autism.

"The Power to Cure" feature film campaign

<https://vimeo.com/150737461>

Dr Jeff Bradstreet discovered that GcMAF (Globulin component Macrophage Activating Factor), which is the GC protein after it combines with vitamin D in the body, has the potential to be a universal cure for cancer. It's also believed to be capable of treating and reversing autism, HIV, liver/kidney disease and diabetes. Dr Bradstreet evidenced that GcMAF cures many conditions with a very high success rate. GcMAF is produced naturally in the body (<https://en.wikipedia.org/wiki/GcMAF>) and has been found to be very low in autistics.

He discovered that **nagalase** (<http://gcmaf.timsmithmd.com/book/chapter/52/>) **was being deliberately added to vaccines** (it causes immunodeficiency by preventing vitamin D binding to the GC protein) and that GcMAF kick starts the immune system to recover it. The FDA raided his office shortly before his death (this is apparently the search warrant <https://www.scribd.com/doc/272577546/Bradstreet-Search-Warrant> - notice they took patient records and employee records), took his work and he was subsequently found floating in a river with a gunshot wound to his chest, supposedly having 'committed suicide'. There is a multi-billion dollars/pounds pharmaceutical industry in cancer and other treatments which would be destroyed if a cure for cancer and other conditions were found. It pays for them to keep people sick. (<https://www.sott.net/article/300285-Nagalase-and-the-links-to-vaccines-and-chronic-diseases>)

Authorities are seizing GcMAF that the public have been buying and shutting down production operations at FirstImmune, the organisation that has been supplying it. Despite that their purification process was second to none and there were no concerns over contamination as claimed. Dr Bradstreet left behind a family including an autistic son and an autistic step-son. There are worldwide studies on the efficacy of GcMAF.

"Murdered Holistic Doctors Had Discovered Autism/Cancer-Causing Enzyme Intentionally Being Added to All Vaccines"

<http://beforeitsnews.com/alternative/2015/11/murdered-holistic-drs-had-discovered-autismcancer-causing-protein-intentionally-being-added-to-all-vaccines-3246756.html>

Research has uncovered that autism and cancer genes are linked:

"Pathway Network Analyses for Autism Reveal Multisystem Involvement, Major Overlaps with Other Diseases and Convergence upon MAPK and Calcium Signaling"

That our integrated findings point to the process "calcium-PKC-Ras-Raf-MAPK/ERK" suggests the possibility that disturbances of this process involving the overlapping genes may contribute to ASDs. Notably, the mutation of RAF1, which is also an ASD-associated gene, is additionally associated with dilated cardiomyopathy [45] and hypertrophic cardiomyopathy [46], whose two corresponding pathways were found to be enriched and merged into collection cardiac diseases from the pathway network. PKC and Ras-MAPK/ERK signaling are both known to be associated with cancer [18,47] and involved in regulation of metabolism [23,48]. Taken together, we see that the process "calcium-PKC-Ras-Raf-MAPK/ERK" which our findings suggest may play a key role in ASDs, is also involved in cancer,

heart diseases and metabolic problems, some of which are already known to co-occur with or lead to increased familial risk for ASDs [25–27]."

<http://journals.plos.org/plosone/article?id=10.1371/journal.pone.0153329>

From FirstImmune, the producers of therapeutic GcMAF:

"Around 180 scientists from 8 nations have published research papers on GcMAF.

We ourselves have written 31 research papers, all peer reviewed and published in prestigious scientific journals or conferences.

9 papers in Autumn 2014 making 15 in the year so far. In the autumn of 2014 our scientific team published and presented at prestigious conferences, 9 peer-reviewed scientific studies that demonstrate a plethora of effects of GcMAF in vivo and in vitro.

Many of these biological effects of GcMAF had not been described before and they represent an epochal breakthrough in the field of immunotherapy of cancer and other diseases."

<https://immunocentre.eu/research-papers/>

First Immune, the Guernsey company who was supplying GcMAF made the following statement on their Facebook page: "First Immune GcMAF Company Statement: The MHRA investigation is still at the incompetent stage. 10 of them arrived, 4 in bulletproof vests, to terrorise the two female scientists who were there. And threaten and terrorise is exactly what they did. They raided the wrong lab, a new one we are building, in which we have never made GcMAF. They thought **our chief scientist** has a degree in Real Ale brewing, when he's **a PhD biochemical scientist at the top of his profession. 180 scientists from 8 nations have written scientific research papers on GcMAF.** They said we do no research at the lab, when we've published 31 research papers from there, more than any other group. They had clearly never read a GcMAF research paper, and probably never will.

They sent some of our GcMAF off to two government laboratories to test for sterility, not knowing that **we already use the governments HPA laboratory to test and confirm for sterility.** They don't know **we do 9 tests on our batches.** They will find, as the Dutch government did, that the sterility is excellent. Unlike the Dutch government, they will not tell us that, as a result, it is safe for people to use. They made a number of false statements on their website about us. There have never been concerns that the product is contaminated. We test for sterility internally and externally. The University of Florence was astonished that, after four years of experiments, **the sterility was always intact,** there had never been any contamination, and every batch was active. (The MHRA won't be sufficiently competent to test for activity.)

Rather surprisingly the MHRA stated, "We have received no reports to date of side effects caused by this product." They've never licensed a drug without side effects, so our protein is a first for them. The drugs they license are full of side effects, and are the number 4 killer of mankind according to the American regulator, the FDA, on their website (see www.chemokills.info for a link). Bad law kills, and the UK has the worst medicines laws in Europe. 160,000 die of cancer unnecessarily every year as a result, and tens of thousands from dangerous drugs that the MHRA license. The MHRA block the public's access to modern science, and protect the old monopolies of the billion dollar pharmaceutical companies, who fund them.

Hundreds of thousands of British lives would be saved every year if the MHRA were closed down. The MHRA are about absolute power and control. They won't even allow people to have a few billionths of a gram of GcMAF, our own protein that we make ourselves. So they even want human body parts

to be subject to their licensing. The MHRA's jurisdiction covers the UK only, and doesn't cover Guernsey; **Guernsey elects to follow the MHRA by choice.** GcMAF is the best treatment currently known for about 50 diseases including cancer, and over 9,000 people have taken it." 24 September at 09:43

"Scientists Developing New Autism Vaccine

In essence Big Pharma wants to vaccinate our vulnerable children against the damage that may be caused by ... vaccinations. The thought is that if you alleviate specific symptoms, you can alleviate the danger or damage ... This has to be the most idiotic thing I have ever heard, but par for the course Big Pharma navigates ... Alleviate the symptoms and you make money, alleviate the malady and you don't!"

<http://www.thelibertybeacon.com/scientists-developing-new-autism-vaccine-ignoring-likely-cause/>

Vaccine Fraud and Whistleblowing

Look into the June 2000 "Simpsonwood Retreat Center" (secret) meeting in Norcross, Georgia (USA) attended by the CDC, FDA and multiple other bodies and how they had identified that there was a vaccine link with autism. Dr Verstraeten of the CDC was involved in the testing of 100,000 children from which the link was discovered. They colluded within that meeting to cover-up the information. (Research fraud is in fact widespread, so they can make studies look any way they want: https://www.nasw.org/users/mstrong/2009/2009_05/Fraud.htm & <http://www.ncbi.nlm.nih.gov/pmc/articles/PMC3700330/>)

"CDC Autism/Vaccine Coverup Extends to Media and Journals"

<http://www.greenmedinfo.com/blog/cdc-autismvaccine-coverup-extends-media-and-journals>

US Investigative journalist Ben Swann's video report, of the CDC's cover up about the MMR vaccine and autism link:

"...a documented case of massive corruption" ... "the data the CDC destroyed show MMR-autism correlation in 2 groups, children with 'isolated' autism [autism without other additional conditions such as retardation, cerebral palsy, epilepsy etc.] given the MMR before 36 months and African American male children given the MMR before 36 months"

<http://www.jeffereyjaxen.com/blog/new-jama-study-confirms-nurse-whistleblowing-routine-hospital-vaccine-damage-happening-to-infants>

Actor Robert DeNiro was supporting a new 2016 film called VAXXED by producer Del Bigtree, with Dr Andrew Wakefield. It tells the story of the CDC cover-up of vaccine research showing that MMR caused autism in black children before 36 months and isolated autism in all ages and groups. It was not about the accusations against Dr Wakefield. Dr William Thompson, CDC scientist had come forward with the information which he had a part in covering up. The premiere was scheduled at the Tribeca film festival and as money talks, pressure built and the film was pulled.

The CDC themselves are responsible for the censorship of the film by Tribeca.

"The onslaught against the documentary began when the release of a statement that VAXXED would be shown at Tribeca sounded the alarm, and a network of "more than 100 prominent individuals and science research bodies run out of the Immunization Action Coalition (IAC)" sprung into action to vehemently oppose it.

Further research reveals that the IAC is simply an extension of the CDC. Funded by Grant No. 5U38IP000589, the IAC website is simply a library of materials from the CDC that promote vaccination.

Not only is the Immunisation Action Coalition (IAC) funded by the CDC, it also receives funding (as of 2015) from 6 pharmaceutical companies, private practices, industry associations, and hospitals—all of whom united to censor VAXXED.

Conference calls were organised to formulate a broad-scale attack against the "anti-vaccination" documentary, labelling it "scurrilous and misleading". Dr. Andrew Wakefield was set upon, and labelled as "the disgraced former British doctor... who was struck off from medical practice in 2010 for serious professional misconduct." Moreover, "Leading figures in the film world were also enlisted to add their objections to the showing of Vaxxed". It was a planned attack; with a network prepared for battle, the scientific community was ready for the fight."

<http://globalfreedommovement.org/cdc-censors-vaxxed-documentary-attack/>

Now why would they do that if they'd nothing to hide?

Here are the CDC documents Dr William Thomson whistleblaw about:

<https://www.dropbox.com/sh/g6t3mokoimh3o4j/AABHVqjnM7ryClmYBecDnQZza?dl=0>

[Dr Andrew Wakefield – Fraud or Hero?](#)

Dr Andrew Wakefield is not 'anti-vaccine' and he did not set out looking for a link between MMR and autism in his 1998 research. Children were suffering bowel inflammation and it was the parents that kept reporting to him that they had shortly before, had the MMR vaccine and were convinced it was connected. Wakefield has written his own book about the events – *"Callous Disregard"*, which is to be made into a film:

"Pirates of the Caribbean' Writer to Pen Movie About Vaccine Scandal Surrounding Autism

Terry Rossio, the Oscar-nominated writer of "Shrek" and the "Pirates of the Caribbean" franchise, has teamed with Dr. Jocelyn Stamat to acquire the film rights to "Callous Disregard: Autism and Vaccines — the Truth Behind a Tragedy," by Dr. Andrew Wakefield."

<https://www.thewrap.com/pirates-of-the-caribbean-writer-to-pen-movie-about-vaccine-scandal-surrounding-autism/>

"The Lies About Andrew Wakefield"

<http://www.ageofautism.com/2016/03/the-lies-about-andrew-wakefield.html>

For any doubters, you will see in the following video, how he was unfairly demonised. Very shocking evidence in here of corruption in power. Such as sending dangerous versions of the MMR vaccine withdrawn from the UK, as they knew it caused meningitis, to 3rd world countries.

"Dr Mercola interviews Andrew Wakefield" (2012)

Natural health expert Dr. Joseph Mercola and Dr. Andrew Wakefield talks about autism, childhood vaccine safety, and his controversial MMR study."

<https://www.youtube.com/watch?v=d40suCKnjbI>

In his own words, Dr. Wakefield has stated:

"... They've underestimated the mothers, who are formidable. What a formidable force, and far more frightening in many respects than the CDC or the pharmaceutical industry. They know what happened to their children, they're not going to be put off, they're not going to back down from this fight and they are a tremendous inspiration. So much of what I've understood, what I know now about autism and the gut-brain link and the immune system link and detoxification and so on has come from parental insights and not, sadly, from any insights from the medical profession or scientists. That is instructive in itself. Therefore when they say this is what happened to my child in the face of a vaccine, we have to take that extremely seriously."

<https://vactruth.com/2016/04/23/doctor-andrew-wakefield/>

Have a look at the following video, especially at **4:03**, where the interviewer asks Del Bigtree (producer of VAXXED) about Andrew Wakefield's reputation. Del says he thoroughly investigated Dr Wakefield beforehand in-depth and that:

"The world lost one of the greatest scientific minds of our time, when Andy Wakefield was taken from us. This was a man who was doing studies that were going to lead to healthier vaccines and better ways to take care of the health of our children. That unfortunately was going to cost a lot of money for the vaccine industry and they cared a lot more about their industry and their money than

they did about the health of children. And so I can confidently say, that I am proud to be working on this picture about the CDC whistleblower with Andy Wakefield."

"The amount of doctors I have spoken to that have said Del, I know that vaccines are causing autism. But I won't say it on camera because the pharmaceutical industry will destroy my career, just like they did to Andy Wakefield." (nice that people taking the Hippocratic Oath think more of their careers than they do the health and wellbeing of human beings eh.)

<https://www.youtube.com/watch?v=tvcdh7KlgPI>

This lady is one of the parents of the children in Wakefield's so-called discredited study. The video also refers to "the lies of Brian Deer", the journalist who has done his utmost to slur Wakefield's name and label him a fraud. Apparently Brian Deer was the person who sent the original complaint about Wakefield to the GMC:

[Compensation for Vaccine Injury](#)

People always say that vaccine injury is a worthwhile risk for the sake of the vaccine programme. What if it happened to you or your child? Money cannot undo the damage and in some cases, it's a paltry figure anyway – that is when you can even get it.

The United States has the **Vaccine Adverse Event Reporting System**.

The [Vaccine Adverse Event Reporting System](#) (VAERS) is a passive [surveillance](#) program administered jointly by the [Food and Drug Administration](#) (FDA) and the [Centers for Disease Control](#) (CDC).

VAERS is intended to track adverse events associated with vaccines. VAERS collects and analyzes information from reports of adverse events (possible side effects) that occur after the administration of US licensed vaccines. The program's success in tracking vaccine injuries has been questioned by some, who allege medical practitioners frequently fail to make reports. Others say that it may overstate possible injuries since many neurological problems in childhood may manifest at around the ages when vaccines are routinely administered.

Vaccine Safety Datalink The [Vaccine Safety Datalink](#) (VSD) is composed of databases from several organizations containing information regarding health outcomes for millions of US citizens and to enhance assessment of vaccine injuries. It was designed to allow for such things as comparisons between vaccinated and non-vaccinated populations, and for the identification of possible groups at risk for adverse events.

The UK has the yellow card reporting system for adverse events, but it is voluntary and **vastly under-used**, meaning many adverse events **never get reported**. So a picture of risk from a particular vaccine is therefore very hard to come by, misleading people to believe it's safe. Not only that, but doctors tend as a rule, to dismiss people concerned that symptoms resulted from vaccinations and if someone doesn't know about the yellow card system and the doctor blindly trusts vaccines as most do, the events will not be recorded at all. (If you don't believe me, have a look here: a 2006 report "*The Yellow Card Scheme – Why are GP's Under-Reporting?*")

<http://onlinelibrary.wiley.com/doi/10.1002/psb.405/pdf>)

<https://yellowcard.mhra.gov.uk/the-yellow-card-scheme/>

What's more, the Government doesn't even want all the negative events reported!

<https://www.gov.uk/drug-safety-update/new-guidance-on-reporting-suspected-adverse-drug-reactions-in-children>

So instead of autism being paid out as a vaccine injury, see how they are paying out, but renaming it to maintain the lie.

"Lawsuit Reignites Vaccine Safety Concerns"

<http://www.nvic.org/NVIC-Vaccine-News/July-2012/merck-lawsuit-reignites-vaccine-safety-concerns.aspx>

What about the UK? Well, we do have a vaccine injury programme, you can receive a maximum payout of £120k for the death or severe injury of your child and it is a "no fault" payout, which protects the pharmaceutical manufacturers from legal claims, just like in the USA. You will note the Government states "...*severely disabled as a result of a vaccination against certain diseases...*". So if you are significantly disabled but they don't believe it qualifies as severe enough, or if it's one of the diseases they won't compensate for, you will get nothing. You can imagine the fun lawyers will have with that too.

<https://www.gov.uk/vaccine-damage-payment/overview>

Wikipedia states: "*Disabled vaccine injury patients are allowed to file a claim up to the age of 21. The 'disability threshold' before payments are granted is 60%. The scheme covers vaccinations for illnesses such as tetanus, measles, tuberculosis and meningitis C. As of 2005, the British government had paid out £3.5 million to vaccine injury patients since 1997.*[10]"

"Forbes' Willingham Wrong on Courts, Vaccine Injuries and Brain Damage"

<http://www.ageofautism.com/2013/08/forbes-willingham-wrong-on-courts-vaccine-injuries-and-brain-damage.html>

What can you do if your child is vaccine damaged? <http://www.thompsons.law.co.uk/questions-answered/time-limits-bring-claim.htm> "*Special rules apply for children or patients being treated under the Mental Health Act 1983. The time limit (limitation period) does not begin for these people until the legal incapacity is removed. In the case of a child, the three year time limit would begin from the date of their 18th birthday...*" **So this is why you have until your child is 21 to claim.**

What Financial Interests Are There?

"Vaccine Market Worth \$52bn n 2016"

Global vaccine revenues will be \$52bn (€36.2bn) in 2016, more than double the total for 2009, driven by new products and indication expansions of established therapies, according to a report."

<http://www.in-pharmatechnologist.com/Regulatory-Safety/Vaccine-market-worth-52bn-in-2016>

"Conflicts of Interest in Vaccine Policy Making

- The Chairman of the CDC's advisory committee until very recently owned 600 shares of stock in Merck, a pharmaceutical company with an active vaccine division.
- Four out of eight CDC advisory committee members who voted to approve guidelines for the rotavirus vaccine in June 1998 had financial ties to pharmaceutical companies that were developing different versions of the vaccine.
- 3 out of 5 FDA advisory committee members who voted to approve the rotavirus vaccine in December 1997 had financial ties to pharmaceutical companies that were developing different versions of the vaccine. "

<http://www.nvic.org/nvic-archives/conflicts-of-interest.aspx>

"Dangerous Doctor: Media Vaccine Promoter has Huge Conflict of Interest

Dr. Paul Offit is infamously known among vaccine safety advocates as the doctor who has gone on record stating that he believes a baby can handle as many as 10,000 vaccines during infancy.

Dr. Offit is a dangerous man. If he gets his way, he will make all vaccines mandatory for every single child in America. He wants to take away parental choice when it comes to the issue of vaccines.

And for good reason. He holds a patent on a vaccine he developed with Merck, and has earned millions of dollars on royalties. That income will increase in the future with the sale of more vaccines."

<http://healthimpactnews.com/2014/dangerous-doctor-media-vaccine-promoter-has-huge-conflict-of-interest/>

What Does Non-Mainstream Media Have to Say?

There are many websites, outlets and alternative media reporting on the autism-vaccine connection. Anybody who posts information on the internet from these sources, is immediately labelled an 'anti-vaxxer' and the sources are the first thing to be targeted with labels such as 'quackery' without any attempt to read or respond to the information contained. Most people just want safe vaccines, they are not anti-vaccination at all. That such instant fervent attempts to discredit the sources will ensue, begs the question, why so rigid and unwavering in condemnation – surely an open mind and honest debate would be the expected response if you are telling the truth? Surely attempting to educate those who you see as misguided? It's exactly what always happens to whistleblowers bringing out the truth, denigrate and ridicule to deflect from the information they bring and continue the cover-up of the truth.

It matters **not** the source, what matters is the **information** within it. Online vaccine trolls will dismiss everything based on the source they declare to be anti-science and if it's a research study, they will claim it is weak for any reason they can drum up (*ignoring the weakness in so many studies claiming there is no link*). In fact, because they don't bother reading the information, they miss the research and logic contained and are unable to respond to the evidence and facts. They deteriorate into rants and tirades whilst ignoring it all. There are some who claim these trolls are paid skills for 'big pharma'. You can make your own mind up as to who they are and their motives.

"Trace Amounts" movie: <http://traceamounts.com>

"Vaxxed" movie: <http://vaxxedthemovie.com/>

www.StopMandatoryVaccination.com "Dr. Kenneth P Stoller, MD was trained as a pediatrician at UCLA and was a fellow of the American Academy of Pediatrics for two decades. In 2008 he resigned from the AAP after realizing that the AAP has known that mercury in vaccines can cause Autism and other neurological damage, yet the organization has refused to make a determined effort to have mercury (in thimerosal) removed from all vaccines.

And in fact, has instead engaged in a cover-up to protect the interests of the vaccine makers and pharmaceutical empires. Please share far and wide - the public needs to hear this! Dr. Stoller's Website for parents wondering if their child will qualify for a medical exemption"

"Autism: Made in The USA" movie

"In this award-winning documentary film Gary Null explores the causes and solutions to the recent epidemic of autism in our children. In this film you will see children who have made an extraordinary recovery as they reconnect with the world around them."

"Legally Censoring Speech on Vaccines and Autism: A Response

Just what is the difference between cases of brain damage that the U.S. government has compensated as a vaccine injury and those of "autism" that the government has refused to compensate? Several co-authors and I asked that very question in 2011, publishing an article in the Pace Environmental Law Review, entitled "Unanswered Questions from the Vaccine Injury Compensation Program" which finds that many compensated brain injury cases feature autism. The program compensated the cases for brain damage and seizures, but autism was present in a high percentage of cases. Dr. Julie Gerberding, former director of the Centers for Disease Control and Prevention and now a Vice President at Merck, Inc., acknowledged on CNN in discussing a federally-compensated case featuring autism that "... if you're predisposed with the mitochondrial disorder, it [vaccination] can certainly set off some damage. Some of the symptoms can be symptoms that have characteristics of autism."

In plain English, Dr. Gerberding acknowledged that vaccines caused the child's autism, as there is no meaningful distinction between "characteristics of autism" and autism, because the diagnosis is based solely on characteristic symptoms.

Another decision from the Vaccine Injury Compensation Program, *Banks v. HHS*, states the reality of vaccine-induced brain injury including autism more starkly: "Bailey's ADEM [acute disseminated encephalomyelitis] was severe enough to cause lasting, residual damage, and retarded his developmental progress, which fits under the generalized heading of Pervasive Developmental Delay, or PDD. Additionally, this chain of causation was not too remote, but was rather a proximate sequence of cause and effect leading inexorably from vaccination to Pervasive Developmental Delay," which is an autism spectrum disorder."

The Human Side of Vaccine Injury

The NHS in Southampton gives baby illegal vaccination without parents' knowledge leaving her severely vaccine damaged, autistic, epileptic and multiple difficulties:

"Jodie Marchant was seriously vaccine injured in 1993 after being secretly given an untested, illegal 8-in-1 vaccine, against her parents' written consent"
