

# JCE

Joe Casali Engineering, Inc. is a full service civil and site engineering firm, established and incorporated in Rhode Island in 2003. JCE is organized to comprehensively develop and consult for a wide variety of clients at all stages of planning, design, construction and operations in the areas of: Storm Water Management/ Drainage Design, Hydrology, Site Design & Development, Roadway Design, Site Grading, Wetland Delineations & RIDEM Permitting, Floodplain Studies, Subsurface Exploration & Soil Evaluations, Water Design and Hydraulic Modeling, Sewer Design including Low Pressure Force Main Design, Individual Sewage Disposal System Design (OWTS), Construction Phase Services Including Inspections, Traffic Engineering and Contract Administration.

Project experience ranges from complex drainage, utility and roadway designs, to land development improvements including commercial, industrial and residential projects. JCE is experienced with site revitalization and community comprehensive permits as well as permitting major land development projects through every Rhode Island Municipality along with state agencies and federal agencies, including but not limited to, the RI Department of Environmental Management, RI Department of Transportation, Kent County Water Authority, Providence Water Authority, Coastal Resources Management Council, Narragansett Bay Commission and the Federal Emergency Management Agency.

JCE has built and takes pride in a reputation for being technically advanced, innovative and responsive to clients, along with offering immediate attention and service because of our central location in Warwick, Rhode Island. Our clients have sought us out because of our reputation for integrity, professionalism and the resulting relationships within the community and amongst regulatory agencies.

Through a substantial background working with private clients, JCE is accustomed to meeting demanding project requirements on time and on budget. JCE is committed to setting the standard for responsiveness, client satisfaction, and expediency by meeting demanding schedule and design requirements without exception. The core of JCE's service delivery is a dedication to fostering client relationships and working diligently to understand and meet the needs of each client and project. Staff at JCE are assigned to key roles and devote the time required to ensure completion of projects with the highest quality of service in timely manner and within budget.

JCE's approach is to provide state-of-the-art professional service with open and productive communication to ensure project success. This is done by focusing on the client's needs, goals and expectations and developing a project vision to satisfy.
