

INFRARED BODY SLIMMING/DETOX

The Sudatonic™ Infrared System uses infrared technology combined with patented French creams making it the one and only fat loss system of its kind! The Sudatonic™ attributes to body contouring and slimming using the FAR Infrared (FIR) Blanket because of its heat penetration property, FIR radiates to the meridian points of the body. FAR Infrared heat has therapeutic uses such as: detoxification, body core temperature increase, pain relief, and increased circulation. In one hour of treatment you can lose an average of 2 to 3 pounds and burn an average of 1800 calories.

How does it work?

A barrier cream is applied to make sweating difficult, forcing fat cells to begin releasing fatty acids in order to provide energy needed to push perspiration through the body. By forcing the body to burn stored fat, Sudatonic™ breaks down fat reserves, hereby eliminating excess fat. Over time, with repeated use, and improved eating habits, fat cells return to “normal” shape, improving capillary and lymph circulation.

Overall benefits of the Sudatonic™ Infrared System include:

- Weight loss (not just water weight)
- Increases metabolism
- Burns calories
- Reduces cellulite/stretch marks
- Decreases body fat
- Detoxification
