## USEF & FEI LEGAL

SERVING SIZES: 30 | 60 | 90

**DIRECTIONS:** As a top dress to your horse feed, administer 2 level scoops per day for the first 5 days, the one scoop per day thereafter, per 1,000 lbs horse. For severe cases, 2 level scoops twice a day for 10 days.

**INGREDIENTS:** Flax Meal Organic, D-Biotin, L-Arginine, Paprika Organic, Himalayan Salt, Horse Chestnut, L-Methionine, Glycine, L-Proline, L-Alanine, L-Threonine, Vitamin C (Ascorbic Acid), L-Lysine HCL, L-Leucine, Citrus Bioflavonoid, Calcium Citrate, Algae Spirulina Organic, Zinc Gluconate Dihydrate, N-Acetyl-L-Cysteine, Vitamin A (Palmitate), Vitamin D3 (100,000 IU), Vitamin E, Vitamin B3 (Niacinamide Crystalline) Vitamin B12 (Methylcobalamin), Copper Gluconate.

## HEALTHY HORSE PRODUCTS

# Hoof, Hair & Coat

Support your horse's hooves by increasing blood flow to the hooves, which helps improve hoof growth and quick recovery. Hoof, Hair and Coat formula has key ingredients to support healthy hooves, while preventing cracking; including natural ingredients to help your horse's coat come in thick, shiny and full. The combination of herbs, minerals, vitamins and amino acids help keep your horse's hooves healthy, and support a healthy coat.

- **Flax Seed** is an excellent source of Omega-3 essential fatty acids, "good" fats that have been shown to have heart-healthy effects. Flax Seed contains more Lignans (which have both Plant Estrogen and antioxidant qualities) than other plant foods. Flax Seed contains both the soluble and insoluble types of fiber.
- **Biotin** is used for the maintenance of hoof health. It aids the joints by building strength in the feet, therefore leading to less wear and tear on the connective tissues.
- **L-Arginine** is necessary for the production of protein. It also helps rid the body of ammonia (a waste product) and stimulates the release of insulin. L-Arginine is also used to make nitric oxide (a compound that relaxes the blood vessels).
- **Paprika** great for a healthy, shiny, thick coat.
- **Himalayan Salt** provides valuable electrolytes, and is rich in nutrients and minerals. Produces significant positive effects on organs, respiration, circulation, connective tissue, nervous system functions and rapid re-hydration. Contains 82 minerals and trace elements essential to the body's health and well-being
- **Horse Chestnut** has been shown to reduce swelling and fluid retention after injury. In horses, its capability to improve blood flow and generate collagen makes it excellent for relieving cases of Laminitis.
- **L-Methionine** helps with the effects of toxicity, as well as allergies.
- **Glycine** is one of the non-essential amino acids and is used to help create muscle tissue and convert glucose into energy. It is also important to maintaining a healthy central nervous system.
- **L-Proline** is a precursor of collagen, which functions to support skin, bones, muscles, tendons, and cartilages.
- **L-Alanine** helps convert blood glucose to energy and reduce muscle

fatigue. It is a popular amino acid used for energy metabolism and maintaining low blood sugar levels.

- L-Threonine is an essential amino acid which is necessary for the proper storage of glucose in the liver.
- **Vitamin C** (Ascorbic Acid) is essential for the formation of bone and cartilage. It helps the body develop resistance against infectious agents and scavenge harmful, pro-inflammatory free radicals.
- **L-Lysine** is one of the essential amino acids, meaning it cannot be synthesized by the body and must come from diet. L-Lysine is important in the formation of collagen (the protein that forms the matrix of bone, cartilage and connective tissue). Lysine supplements enhance the intestinal absorption of calcium and reduce the excretion of calcium in the urine. Lysine deficiency may result in immunodeficiency. Lysine can help inhibit the multiplication of virus while Arginine can stimulate viral multiplication. L-Lysine may prevent or decrease the severity of any viral flare-up. It is used in the treatment of bone diseases and may aid bone healing from injury.
- **L-Leucine** Ethyl Ester Hydrochloride is an essential amino acid that cannot be made in the body. It helps build tissues in the body, preserves muscle tissue, and keeps the body energized.
- **Citrus Bioflavonoids** have an anti-inflammatory and antioxidant properties.
- **Calcium Citrate** aids in bone formation.
- **Spirulina** offers support for healing hypoglycemia, diabetes, chronic fatigue, anemia, ulcers, and

boosts the immune system.

- **Zinc Gluconate** is a mineral required for the function of numerous enzymatic pathways. It quickens the healing of skin ulcers, acne conditions, infections, disease, and improves the immune system.
- **N-Acetyl-L-Cysteine** has detoxification and antioxidant properties, and aids the respiratory system. Cysteine is a key component of Glutathione, the body's toxin-neutralizing powerhouse.
- **Vitamin A** is beneficial to the immune system, skin, and eyes.
- **Vitamin D3** maintains blood calcium levels for normal functioning of the nervous system, as well as for bone growth and the maintenance of bone density.
- **Vitamin E** (DL-Alpha-Tocopheryl Acetate) battles against oxidative stress caused by free radicals within the body. It possesses anti-inflammatory effects that can combat arthritis, rheumatism, asthma, and other inflammatory disorders.
- **Vitamin B3** (Niacinamide) improves blood circulation and considerably reduces the risk of heart attack and peripheral vascular disease. It is very effective in increasing joint mobility, enhancing muscle strength, and reducing muscle and joint fatigue.
- **Vitamin B12** (Methylcobalamin) helps in healthy regulation of the nervous system, reducing depression, stress, and brain shrinkage. It helps maintain a healthy digestive system, protects against heart disease, stroke, and high blood pressure.
- **Copper Gluconate** is essential to immune system health. It has also been used to help with Osteoarthritis.
