

Pevco Smart Seal™

> Guard Against Spills and Protect Fragile Cargo

Integrated within a pneumatic tube station or placed on a nearby counter, the Pevco Smart Seal's convenient, automatic operations make it easy to guard against spills and protect fragile cargo. Simply place items into a single-use bag. Slip the top of the bag between the heat sealing guides. The guides automatically latch and hold the bag in place. When finished, the guides release the perfectly sealed bag and the protected contents are ready to be added to a waiting carrier. Smart Seal is ideal for protecting spill-prone lab specimens, valuable blood products and pharmaceuticals, and fragile or sterile supplies.

Saves Time.

Automatic fail-proof operation seals in less than four seconds.

Secure.

Shields staff from potentially hazardous spills, protects fragile cargo from breakage and helps to maintain sterile product conditions.

Cost-Effective.

Spills are contained – eliminating costly, time consuming system shut-down and hand delivery.

Reliable.

Pevco Smart Seal™ is UL Listed and built to withstand the 24/7 demands of hospital operation.

No double bagging. No zip-lock failures. A perfect seal every time.

Pevco Smart Seal™
