

## Fender Washer for Weights Update

Jan 31, 2017

In our Competition Meeting, it was brought up to use 2" fender washers for weights. After reviewing, we understand that it is very difficult to find these. They are available, but more from specialty places. We will update this to make it 1 1/2" fender washers required. Also, we would like to add that if your weight is over 6"X6", 2 bolts will be required.

I apologize for those of you that have been searching all over with no success for 2" washers.
