

## Computers vs. Books

Mia Murphy was tired when she got home from school last Friday. It had been a long week—she was working on a computer project and had stayed late at school to finish her work. After stepping off the bus and trudging home, she plopped onto her chair in the kitchen.

“What’s up, Mia?” Mr. Murphy asked. He was making Mia her favorite after-school snack, a grilled cheese sandwich.

“This project is taking me forever!” Mia replied. “I have to design a website page for my computer class.”

“Wow, fancy!” Mrs. Murphy shouted from the living room. “When we were in middle school, we didn’t even know how to use computers.” She walked into the kitchen and sat down next to Mia. She asked her daughter if she had anyone to help her with her project.

“We have partners—mine is named Ali,” she explained. “Today we learned how to insert pictures into our page!”

Mr. and Mrs. Murphy looked at each other and smiled. Mia noticed their little exchange. “What?” she asked, wondering what they were thinking.

“Well, we first met when we were working on a project together in high school,” Mr. Murphy explained. “We were assigned to do a research project on American Indian history.”

Mrs. Murphy chimed in. “But we didn’t have computers back then, so we had to go to the library every day to do research!” She explained that they didn’t have online search engines to help them with their work; they could only rely on books. They didn’t have cell phones to text each other when they needed help—they had to work together at each other’s houses.

“But that sounds so hard!” Mia said. “I can’t imagine completing a project without the help of a computer.”

Mr. Murphy chuckled. “I know. But I have that project to thank for meeting your mom! All those countless hours in the library...we had to spend a lot of time together,” he said.

Now Mia was curious. She wondered what else was different when her parents were growing up. So she asked.

Mrs. Murphy started to list off things she didn’t have as a child, like an mp3 player and a flat-screen television. “Also, since I had many brothers and sisters, we had to pitch in more. I helped my mom cook dinner, and we repaired our clothes ourselves when they tore,” she said, tapping Mia on the nose. “How about you help me cook dinner tonight then?” Mrs. Murphy suggested, laughing.

“Sure!” Mia exclaimed. “How about something that you used to make as a kid?”

“Chicken noodle soup it is,” Mrs. Murphy said with a smile.

- A Obviously
- B On the other hand**
- C Finally
- D As a result

8. Why does Mia's mother think her computer class homework is "fancy"?

**Suggested answer:** Because when Mia's mother was in school, students didn't even know how to use computers. Computers seem like a modern luxury to her.

9. How does Mia agree to "pitch in" like her mother at the end of the story?

**Suggested answer:** Mia agrees to help her mother cook dinner.

10. What is one way that Mia's life is different from her mother's? How do you know? Use evidence from the passage to support your answer.

**Suggested answer:** Answers may vary and should be supported by the passage. Possible answers include

- Mia uses computers to complete her homework, while her mother had to complete her projects by doing research in the library. We know because Mia's mother tells her that when she was in middle school, they didn't even know how to use computers.
- Mia uses cell phones to contact her partner, while her mother and father had to work together at each other's houses. We know because Mia's mother tells her this, and Mia thinks that sounds hard, so we can infer that Mia does not have the same problems.
- Mia may have an mp3 player and a flat-screen television, while her mother does not. Mia also does not pitch in as much as her mother's family did, cook dinner or repair her own clothes. We can infer this because these are the answers Mia's mother thinks of first when her daughter asks her what was different about her life.
