

FASTTRACK

MEDICAL SOLUTIONS™ LLC

The FastTrack Medical Solutions (FTS) FASTBreathe Thoracic Seal, is one of the most advanced thoracic seals on the market today, and boasts numerous improvements over other currently available chest seals.

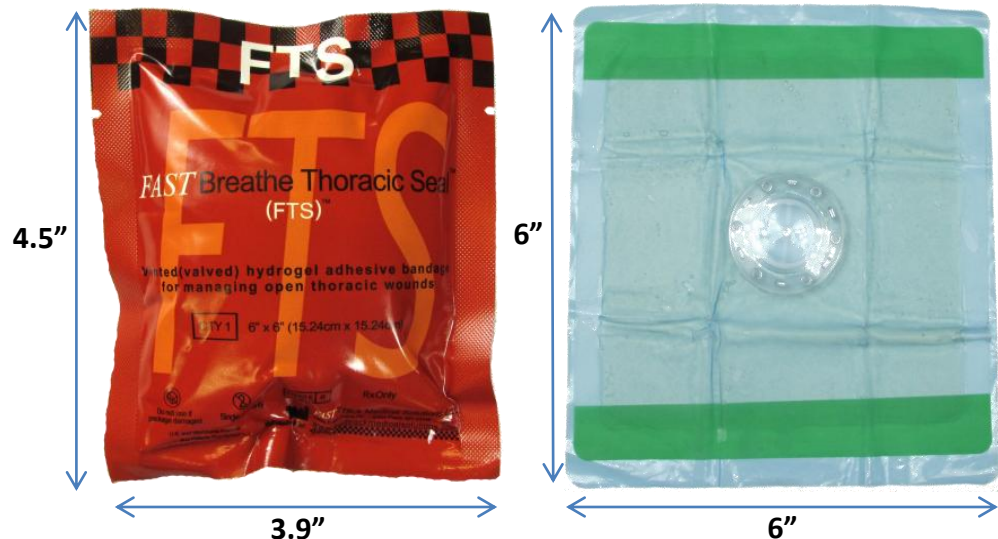

FastBreathe Thoracic Seal (FTS) is intended for use in emergency situations to treat penetrating thoracic (chest) wounds that could comprise the pleural space of the thoracic cavity. A penetrating chest injury could lead to a potentially life threatening condition known as Tension Pneumothorax (collapsed lung) if left untreated.

The FTS seal uses proprietary hydrogel to form an aggressive bond to the skin around the wound, allowing air to escape the pleural cavity and help prevent Tension Pneumothorax. The FTS unique non compressible side venting one valve will function under clothing, armor and coverings.

FTS out-performed other chest seals in adhesion (non-peeling) in side by side testing conducted in a recent DoD comparative study.

The FTS' ability to be folded into a compact cube shape, measuring just 4"x4" size allows it to be carried in in most IFAKs and aid bag.

For additional information or to place an order for FTS, please contact The Activity Group.

FastBreathe Thoracic Seal (FTS)™

- Proprietary FTS hydrogel provides maximum adhesion sticks to dirty, wet, and bloody skin.
- Package includes absorbent wipe for use prior to application of FTS that absorbs up 8 times its weight.
- Unique & durable 360 degree side venting once way valve.
- Valve allows venting the slightest air pressure (.05 PSI) in the pleural cavity.
- Can be placed up, down, or sideways and covered with clothing, blankets, or body armor without obstructing air flow.
- Provides quick visual verification of functioning valve through translucent magnified clear top.
- Easily removed by lifting slightly and adding sterile water.
- Developed with input from US military to comply with new TCCC guidelines for penetrating thoracic wounds.
- 5 year shelf life - will not develop "channeling" in folded areas.
- Tested at prolonged exposure of 140 F
- Sterile Product
- Weight: 1.8oz
- Package Dimensions: 4.5x3.9x.08 in / 11.4x9.8x2.5 cm
- Seal Dimensions: 6.0x6.0x.04 in / 15.24x15.24x1.0 cm
- FTS is U.S. Patent and is Worldwide Patents Pending.
