Mrs. Melania Trump

First Lady of the United States

The White House

1600 Pennsylvania Avenue NW

Washington, DC 20500

Dear Mrs. Trump,

We have been so quietly impressed with the way you are a fierce and constant protection and champion for your son. We are mothers and fathers and feel the same way about our children. We want to protect them, and they are being threatened in very real and dangerous ways by multiple laws passed in our State of California. These laws are threatening our ability to parent and pass on our values to our children and we need your help.

We appreciate all you are doing as our First Lady to look out for certain groups of people who are in need of help. We are asking for your help for our precious children. The public education system has forced a sexualized agenda called 'Comprehensive Sexuality Education' onto our children. It is graphic and explicit, all in the name of equality and diversity and inclusion. This is happening nationwide but has been mandated in our state of California since 2016. The public education system and its unions are working hand in hand with groups such as Planned Parenthood, SIECUS, GLSEN, ACLU, and many others to desensitize our children and turn them into sexual beings to become potential 'justice warriors' for their political causes. Their goals are to turn children away from their family and their faith. We CANNOT let this happen! Our efforts so far seem to be falling on deaf ears, since our legislators in CA are largely being either threatened or paid by Planned Parenthood and the ACLU.

They are starting this Kinsey-based indoctrination from as early as preschool. Alfred Kinsey taught that children are sexual from birth. He arrived at this conclusion after allowing pedophiles to abuse children until they had a "sexual" response. How can they teach our children information based on such horrendous data? We wish we were exaggerating, but we are not. Each year, our children are being exposed to highly biased, inappropriate, medically inaccurate and graphic content through school curricula and supplemental books and videos. This is happening across subjects, not just in

health. They're being encouraged to explore their sexuality and experiment by themselves or with other children. They are being encouraged to engage in self pleasure at very young ages. Their identities as boys and girls are being challenged and this is resulting in great confusion, depression, anxiety and even suicide.

We want to protect our children from harm. We want to maintain and protect our rights as parents to decide what they learn and how they learn it. We are increasingly being told by the public education system that we are too afraid or incompetent to teach our own children so they must do it for us. This is both insulting and degrading to us as parents. We take our role very seriously and want our government officials to support us, not try to pry our children away from us with their curricula.

We also know the importance of children having a childhood. These curricula are too much for them too soon. They deserve to be children and not be presented with very adult content at such young ages, in the name of inclusion. Their brains are literally being rewired by these curricula and it is to their detriment.

This disease began at the United Nations and through their organizations has been harming children worldwide, especially in the poorest countries. California started the infection here in our beloved United States and we all know that what happens in California tends to spread. Other states are already looking at mandating this type of education in their schools. We will not stand by and do nothing. Will you help us?

From one mother to another, please help.

Sincerely,

Thousands of Desperate and Determined CA Parents
