PLANTING INFO

Perennial ryegrass' germination and lateral growth make it a natural choice for establishing quick ground cover on bare soil. A seeding rate of 6 to 8 pounds per 1,000 sq. ft. or 350 pounds per acre is recommended. Under favorable conditions, germination can be expected in six days, and first mowing should occur about in about 3 weeks. Limited use of the seeded area may be realized in about 28 days. This product can be mowed as low as .25 inches; however 2 to 3 inches is optimum performance height. A fertilization rate of 3 to 8 pounds of NPK per 1,000 sq. ft. per season is recommended.

DISTRIBUTED BY:

PERENNIAL RYEGRASS

A WALK ON THE BEACH!

DESCRIPTION

Tired of high maintenance lawns? With Kokomo 2 maintaining beautiful turf is fun again. With its naturally dark green color and dwarf growth habit, Kokomo 2 requires less fertilizer, and less time behind the mower! Leaving you more time to get away from it all!

PERFORMANCE DATA

TURF QUALITY

NTEP 2005-09 data. Mean turfgrass quality ratings of perennial ryegrass cultivars grown in 9 locations in the North Central region: 1-9, where 9 is ideal (LSD=0.4)

CHIVALRY	6.3
KOKOMO 2	6.0
SILVER DOLLAR	6.0
DEFENDER	5.8
BRIGHTSTAR	5.7
LINN	2.8

TURF QUALITY

'SCHEDULE B (MEDIUM MAINTENANCE/ ATHLETIC FIELD)'

NTEP 2005-09 data. Mean turfgrass quality ratings of perennial ryegrass cultivars grown at eleven locations in the U.S. and Canada: 1-9, where 9 is ideal (LSD=0.3)

ZOOM	6.4
KOKOMO 2	6.3
QUICKSILVER	5.7
PALMER III	5.4
LINN	2.7

DOLLAR SPOT

NTEP 2005-09 data. Dollar spot ratings of perennial ryegrass cultivars 1-9, where 9 is ideal (LSD=1.4)

MAJESTY II	6.1
KOKOMO 2	5.7
ZOOM	5.1
PALMER V	4.4
LINN	4.0

Seeding Rate: 14/in²

Production

Turf

Kokomo 2 has your turf needs taken care of with outstanding qualities such as:

- EXCELLENT RESISTANCE TO DOLLAR SPOT
- SUPERIOR TURF DENSITY
- GREAT WEAR TOLERANCE
- SUPERB TURF QUALITY
- HIGH HEAT TOLERANCE
