

# Dyna-Gain

## **Benefits:**

- ✓ **High Forage Yielding**
- ✓ **Improved Cold Tolerance**
- ✓ **Exceptional Crown Rust Resistance**
- ✓ **High Digestibility/ Feed Value**

## **Seeding Rates:**

**New Seeding  
30-40 lbs per acre**

**Overseeding  
15-20 lbs per acre**

**Dyna-Gain** is a strong performing diploid annual ryegrass that exhibits high forage yields and exceptional persistence even under cold and drought conditions.

**Dyna-Gain** has improved disease resistance particularly to crown rust providing improved forage production all year long.

**Dyna-Gain's** outstanding root structure supports the plant even during periods of extended drought. In addition, the root structure on Dyna-Gain makes it ideal for cover crops to improve soil tilth.

**Dyna-Gain** is highly digestible and will provide ample nutrition for all livestock animals.

## **Performance of Ryegrass Varieties in Alabama 2001-02**

	Crossville	Tallassee	Headland	Fairhope	Average
DynaGain	5,626	5,702	9,772	6,106	6,802
Marshall	5,406	5,436	9,147	6,264	6,563
Jackson	5,314	5,435	8,755	6,108	6,403
