

Mungret Park – Inclusion Playground

The new playground in Mungret has opened and what fantastic facility for the region – playground of the future where children of all abilities can play together with specifically designed equipment and walkways for all abilities. It includes soft underfoot surfaces, low level play equipment and wheelchair accessible swings and roundabouts side by side with general playground equipment and a sensory area designed with children on the autistic spectrum in mind. Cycle 4 Sick Children approached Limerick City Council many years ago with the suggestion and now after working closely with Kompan Ireland, the playground has opened. With walkways and adult exercise equipment on a 2km cycle/walkway, the parkland is for everyone. Picnic benches and wide open spaces in a landscaped 11 hectare site. C4SC is proud to have been an integral part of the planning of this parkland.
